THE VIDEOGRAPHER: This deposition is now beginning. The date August 18th, 2016. The time 10:10. This is the deposition of William J. Vigilante taken in the matter of Rachel Dennert versus Medtronic, Inc., et al. in the United States District Court, District of Connecticut, Civil Action Number 3-11-cv-01229(SRU). Counsel will now introduce
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	W. VIGILANTE (The following is not recorded on the videotaped record.) MR. HAVERTY: Dave. MR. SCHULTZ: Sure. Mr. Vigilante, you've tendered to us a fee agreement that you've asked my law firm and, I believe, Ms. Martinez's law firm to execute; and I've indicated to you that I do not intend to execute it for the reason that I am obligated under the rules, the Federal Rules of Civil Procedure to pay you in accordance with those rules, and I, of course, will honor that obligation, but what I won't do is sign a fee agreement for an expert I have not retained which may or may not purport to obligate I or my law firm beyond the rules. So you've asked that I execute it. I have indicated that I will abide by the Rules Of Civil Procedure and I will compensate you as required by the rules, but I will not sign that fee agreement. MS. MARTINEZ: And I join	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	W. VIGILANTE MR. HAVERTY: And just so just so we're clear, we want to put this on the record so that we make sure that everybody is covered in the event there's any type of a dispute later on down the road. MR. SCHULTZ: Fair enough. THE VIDEOGRAPHER: Is everyone ready? Okay. And could you put your mic on? (Discussion is held off the record.) (The following is recorded on the video record.) THE VIDEOGRAPHER: This deposition is now beginning. The date August 18th, 2016. The time 10:10. This is the deposition of William J. Vigilante taken in the matter of Rachel Dennert versus Medtronic, Inc., et al. in the United States District Court, District of Connecticut, Civil Action Number 3-11-cv-01229(SRU). Counsel will now introduce themselves.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. VIGILANTE (The following is not recorded on the videotaped record.) MR. HAVERTY: Dave. MR. SCHULTZ: Sure. Mr. Vigilante, you've tendered to us a fee agreement that you've asked my law firm and, I believe, Ms. Martinez's law firm to execute; and I've indicated to you that I do not intend to execute it for the reason that I am obligated under the rules, the Federal Rules of Civil Procedure to pay you in accordance with those rules, and I, of course, will honor that obligation, but what I won't do is sign a fee agreement for an expert I have not retained which may or may not purport to obligate I or my law firm beyond the rules. So you've asked that I execute it. I have indicated that I will abide by the Rules Of Civil Procedure and I will compensate you as required by the rules, but I will not sign that fee agreement.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. I can be happy to answer other questions related to how I'm compensated, but I'm not going to provide an answer to that question.  MR. HAVERTY: Why don't we why don't we move on. We'll contact the Judge later about this. Is that all right, David? Q. Mr. Vigilante, how long have you been well, how long have you had Vigilante Forensics? A. I opened up for business on

Page 10 Page 11 1 W. VIGILANTE 1 W. VIGILANTE 2 Q. Since opening Vigilante Forensics 2 A. Again, I -- I haven't done my 3 3 up for business on October 15 -- or October taxes for the year, so I don't know or could 4 1st of 2015, how much money have you earned as 4 give an answer for you other than that. 5 5 an expert witness? Q. I'm not looking for a precise 6 A. I don't know. 6 dollar amount. Are you able to give a 7 Q. How much money -- you have no idea 7 reasonable approximation? 8 8 how much you've earned as an expert witness? A. My approximation is, is that all A. My taxes haven't been done for the 9 9 the money I've generated or the company has 10 10 year. I don't know. generated has been related to forensic work 11 Q. Well, I understand your taxes 11 since I opened up for business on October 1st. 12 haven't been done, but you're just -- you're 12 Q. Right. And so the question is: telling me that you just have no idea how much 13 13 In dollars what's your best estimate as to how income you've brought home from your expert 14 14 much that is? 15 witness's services? 15 A. It -- I don't know. I haven't A. Again, I can tell you that as of 16 16 done the taxes. I haven't been through to 17 October 1st, 2015 all of my income that I 17 find out what the revenue is for the year. generate is through my company, Vigilante 18 18 Q. Can you state what the gross 19 19 income is of Vigilante Forensics? Forensic. 20 20 Q. Yeah, not my question. My A. Again, I haven't calculated it. 21 question was how much money -- if you want me 21 The best I can offer you is maybe the fourth 22 to rephrase it as Vigilante Forensics, how 22 quarter of 2015 was the last time that the much money has Vigilante Forensics earned 23 23 taxes were done. 24 through your provision of expert witness 24 Q. Yeah. So you pay estimated taxes; 25 services? 25 right? Page 12 Page 13 1 W. VIGILANTE W. VIGILANTE 1 2. 2 A. I do pay estimated taxes. revenue your company, Vigilante Forensics, is 3 Q. Okay. And you paid estimated 3 generating; correct? 4 taxes on fourth quarter of 2015; correct? 4 A. How much it's collected in, I A. No, I did not. 5 5 would imagine, up to that point in time. 6 б O. All right. And despite your --Q. Okay. Did you pay estimated taxes 7 on first quarter of 2016? 7 and you paid those taxes; right? 8 A. Yes. 8 A. Yes. 9 Q. And estimated taxes on second 9 Q. All right. And despite having 10 paid those taxes, you're unable to give any 10 quarter of 2016? 11 reasonable approximation of how much revenue 11 A. Yes. 12 O. And the estimated taxes are based 12 your company has generated through your 13 13 upon your best projection of the amount of services as an expert witness? revenues that Vigilante Forensics would 14 A. I can tell you what my taxes were. 14 15 I -- again, you're --15 generate; correct? 16 16 A. It's based upon what my tax Q. Okay. accountant does with the information that I 17 A. -- asking me to give you a guess, 17 provide him. He has access to my books. He 18 and it's my understanding as a rule for 18 19 looks through the money that's been collected. 19 depositions is not to guess or speculate. 20 20 He looks at my tax liabilities. He looks at So --Q. Actually --21 the other issues related to the taxes, and he 21 22 A. -- you're asking me to -- to guess 22 tells me how much he's going to pull from the bank account. 2.3 at numbers I don't have and I don't have 23 24 Q. And one piece of that information 24 access to at the moment. 25 25 that your accountant looks at is how much Q. I'm actually not asking you to

Page 14 Page 15 1 W. VIGILANTE 1 W. VIGILANTE 2 2 guess, and your counsel hasn't objected on have a agreement for with clients, and they 3 3 that grounds, Mr. Vigilante. I've asked if pay the hourly late -- hopefully they pay the 4 you have a reasonable estimate, which is 4 hourly rate when I invoice them. 5 Q. And the hourly rate --5 something different, and if you're saying you 6 can't give me a reasonable estimate because it 6 A. Sometimes I have problems 7 would be just a wild guess, I'll accept that 7 collecting. Sometimes I have clients that 8 8 aren't -- that want to negotiate the final testimony. 9 9 invoice. It just -- it's -- it's variable. A. Well, good. It would be a --Q. Your hourly rate is what? 10 10 Q. Is that what your testimony is? A. It -- I don't have a reasonable 11 A. Currently it's \$350.00 an hour for 11 12 estimate to give to you at the moment. 12 all case-related work except for videotaped 13 13 Q. Okay. Are you full time as an testimony which is 435 an hour. 14 expert witness? 14 Q. Now, why do you charge more for A. I don't know what you mean by 15 15 videotaped testimony? "full time." I run a -- a company that does A. Because it's a more stressful 16 16 17 forensic consulting. 17 event. It's harder to -- to testify under O. Do you work 40 hours a week? 18 18 video and it takes more effort during the How -- how much do you work? 19 19 deposition or the trial testimony or what have 20 20 A. I wish I worked 40 hours a week. you. 21 Sometimes it's 60. Sometimes it's 70. 21 Q. Okay. So you find -- you -- are 22 Q. Okay. And do you generate income 22 you saying that you find this videotaped 23 through your company at the hourly rates that 23 deposition to be stressful? you have quoted to us in your fee agreement? A. Yeah. I wasn't trained as an 24 24 25 A. Yeah, I have an hourly rate that I 25 anchor or newscaster. I'm not used to sitting Page 16 Page 17 1 W. VIGILANTE W. VIGILANTE 1 2 feeling as if you have to look at the camera 2 in front of a camera having to talk to a 3 3 camera for hours at end. So it's a unusual at all times, Mr. Vigilante. 4 and more stressful situation than a regular 4 Why don't you tell me about your 5 educational background if you would. 5 deposition or trial testimony that's not 6 6 A. What would you like to know? videotaped. 7 Q. Well, let's do it this way. 7 Q. Would it be less stressful if you 8 8 MR. HAVERTY: Can we just go off the looked me in the eye instead of looking solely 9 at the camera? 9 record real quickly? 10 10 THE VIDEOGRAPHER: One moment. We A. I think that I'm supposed to be 11 are now going off the video record. The 11 looking at the camera because I'm being 12 videotaped. Why would I be looking at you if 12 time, 10:20. I'm going to be videotaping to the camera --13 13 (A recess is held from 10:20 a.m. to Q. That's your understanding --14 14 10:22 a.m.) 15 A. -- or being videotaped by the (Exhibit Vigilante-1, multipage 15 16 16 document entitled William J. Vigilante Jr., camera. 17 Q. That's your understanding of what 17 PhD, CPE, Human Factors/Ergonomics Expert, a rule is in this deposition for your conduct? 18 18 is marked for identification.) 19 A. I don't think there is any rules THE VIDEOGRAPHER: Back on, 10:22. 19 20 for videotaped testimony, but, again, you're 20 MR. SCHULTZ: Go ahead and hand that 21 videotaping me. I'm going to be looking at 21 to the witness. 22 the camera. 22 THE WITNESS: Thank you. 23 Q. Okay. Well, if there's anything 23 BY MR. SCHULTZ: 24 that causes you to want to look me in the eye, 24 Q. Mr. Vigilante, the court reporter feel free to do that, okay, so that you're not 25 25 has handed you what's been marked as Exhibit 1

Page 22 Page 23 W. VIGILANTE 1 W. VIGILANTE 1 2 2 Vigilante Consulting, and it was sometime able to -- how memory is affected by the 3 3 prior to October 1st. information they get and how memory affects 4 the information -- how they interpret the 4 Q. And why did you decide to form information they collect. We look at also 5 5 Vigilante Forensics or Vigilante Consulting? 6 things such as physical strength, 6 A. Yeah, I wanted to do -- I wanted 7 coordination, and so forth. 7 to have my own company, so I was, I guess, advised to open an LLC. So I opened an LLC to 8 8 The goal of human factors is to take the information we learn about the user 9 do business as Vigilante Consulting. 9 10 I offer both forensic consulting 10 and apply it to the design of products, 11 machines, and systems so that products are 11 and traditional consulting, so I didn't want 12 to call the LLC Vigilante Forensic. So I 12 easy to use, they're comfortable for the users applied for a doing business as Vigilante 13 that have to use them, and that they're safe 13 for use by the multiple users that are likely 14 Forensic so that I can still do traditional 14 15 15 consulting work under to use them. 16 Q. Is it your view that ergonomics 16 Vigilante Consulting, LLC. I know it's a 17 and human factors -- did you say they're 17 little confusing, but that's kind of the reason for it. 18 svnonvmous? 18 19 A. Yes. 19 Q. Are there two separate Q. All right. You said earlier that 20 20 organizations? 21 you formed Vigilante Forensics on October 1st 21 A. No. 22 Q. Okay. Do you do what you call 22 of 2015; correct? "traditional consulting" under Vigilante A. That's the day I started business. 23 23 24 Q. Okay. When did you form it? 24 Forensic? 25 A. The LLC is technically 25 A. No, I would send the -- if a Page 24 Page 25 1 1 W. VIGILANTE W. VIGILANTE 2. 2. client calls and wants me to do traditional Q. Have you -- and I take it you are 3 3 consulting work, I would send them a -- an not under any current engagements to do any 4 agreement, much like the agreement I sent to 4 traditional consulting? 5 Mr. Haverty for my involvement in his case, 5 A. Correct. 6 and it would be titled under 6 O. What do you mean by "traditional 7 7 Vigilante Consulting, LLC. consulting"? 8 Q. Okay. And when you're engaged in 8 A. Non-litigation related. So a 9 litigation or legal-related work, you issue 9 manufacturer may come to me and ask me to help 10 your invoices and your agreements under the 10 them with their product design, usability name "Vigilante Forensic"; correct? 11 11 testing, warning assessment, things of that 12 A. Actually, the invoices are sent 12 nature 13 under Vigilante Consulting, LLC doing business 13 O. So to date, which is about ten 14 as Vigilante Forensic. 14 months operating Vigilante Consulting dba 15 Q. Okay. So there's not two separate 15 Vigilante Forensic, all of your engagements 16 LLCs? 16 have been forensic work: correct? 17 A. No, there's only one LLC. 17 A. All revenue I've generated since Q. All right. Do you -- when you 18 18 opening the company has been forensic or 19 say -- well, let me ask it this way. Since 19 litigation related. 20 forming Vigilante Consulting, LLC, have you 20 Q. Okay. Why the qualification? done any traditional consulting? 21 21 A. 'Cause I really didn't understand 22 A. I've had a few proposals out, but 2.2 your question fully and I wanted to make sure 2.3 I haven't generated any income through 23 I was clear. Vigilante Consulting, LLC doing traditional 24 24 Q. Okay. Have you done other work 25 consulting work. 25 under Vigilante Consulting that hasn't

	Page 26		Page 27
1	W. VIGILANTE	1	W. VIGILANTE
2	generated revenues?	2	Q. Okay. Have any of those proposals
3	A. Like I said, I submitted a few	3	been made to medical device manufacturers?
4	proposals for traditional consulting work	4	A. No.
5	Q. Okay.	5	Q. Pharmaceutical companies?
6	A for clients that were	6	A. No.
7	interested.	7	Q. In terms of the nomenclature, when
8	Q. All right. But that's it; right?	8	you say "forensic work," you're using
9	In other words, you're not	9	"forensic" in the sense of legal related;
10	providing some services for which you're not	10	correct?
11 12	getting revenues under Vigilante Consulting?	11 12	A. Well, typically it's legal
13	A. No. Like I said, the the only	13	created or typically it's legal related for the work that I do, but technically forensic
14	thing I've done other that's not litigation related is I have submitted a few proposals on	14	is just the investigation of an incident to
15	the request of clients that were	15	determine root cause and other variables that
16	non-litigation related, were non-lawyers that	16	may have been involved.
17	were looking for work to be done. So I spoke	17	Q. Okay. Well, I just want to make
18	with them, generated the proposal, sent them	18	sure I understand how you're using the word
19	off, and that's where they stand.	19	"forensic" in your dba. So is that what
20	Q. Have you heard that any of those	20	you're intending to communicate, that you're
21	proposals have expired, meaning that it's not	21	engaged in forensic work?
22	that they're open, but a decision has been	22	A. Yeah, I chose the name to have a
23	made and they've gone in a different	23	connotation that I do forensic-related work.
24	direction?	24	Q. Okay. And by that you mean what?
25	A. I have not heard either way.	25	A. I don't understand. That I do

Page 30 Page 31 1 1 W. VIGILANTE W. VIGILANTE 2 2 A. There is a application that you continuing education? 3 3 have to complete. You have to have, I think, A. Technically you have to -- I guess 4 some prerequisites related to the amount of 4 there's like a form. I haven't gotten there 5 5 years that you've been doing work in the field yet. I think it's every three years you have 6 of ergonomics/human factors. Once you submit 6 to submit a form to the Certification Board 7 7 the application, if you have the with the list of the continuing education and 8 8 prerequisites, they request you to submit a then the proof that you attended the 9 portfolio of work that you've done over the 9 continuing education. And there are so many years. The portfolio of work is apparently 10 points of different types of education, and as 10 given to a panel of reviewers for 11 11 long as the points meet their criteria, 12 they'll continue to allow you to be listed on 12 determination of whether or not it's adequate, 13 appropriate, et cetera, meets the standards of 13 their registry. I assume that if you don't 14 the Certification Board. 14 meet their requirements, there may be some 15 15 time period in which to meet them. I -- I If they're happy with that, you have to sit for an exam. The exam covers the 16 don't know yet. 16 17 different areas of human factors ergonomic --17 Q. All right. When -- when did you ergonomics. You have to have a certain score become first certified? 18 18 19 on the exam, a passing score on the exam. If 19 A. I believe it's been either the 20 you pass the exam, they give you a board 20 spring of '15 or the spring of '14, but within 21 certification; and then to keep the 21 the last two years. certification, you have to meet certain 22 Q. And when you say you had to submit 22 continuing education requirements. 23 some information about your work, can you give 23 me an idea of what -- what was the nature of 24 Q. Anything else you have to do in 24 25 the information you submitted? 25 order to maintain certification other than Page 32 Page 33 1 W. VIGILANTE W. VIGILANTE 1 2. from the Motorcycle Safety Foundation through 2 A. I think I submitted some of the 3 peer-reviewed scientific research that I've 3 different courses, the NRA through different 4 conducted. I believe I submitted a report 4 courses as an instructor. I think there's 5 that I had done for a -- a litigation-related 5 a -- maybe a few more of them that are listed. case. I don't know -- I don't remember what 6 б In the past I've had like Fall Protection 7 Certification, Confined Space Certification. 7 else I did. 8 8 So kind of things of that nature. Q. Have you held any other certifications in your professional areas of 9 9 Q. Who issues these certifications 10 10 you're referring to now? endeavor? 11 A. Yes, so the -- I think the -- the 11 A. There's multiple different 12 answer is yes -- or, excuse me, the answer is, 12 parties. no, I don't hold any other certifications 13 13 So, for example, the motorcycle 14 related to my field. I do hold some other 14 stuff is -- is done through the Motorcycle certifications that are related to the type of 15 Safety Foundation. 15 work that I get involved with, but I wouldn't 16 Raymond offered the certification 16 call them -- they're professional 17 17 for -- for forklift operation. organizations, but I wouldn't call them like a The confined space and the fall 18 18 19 academic professional organization like human 19 protection were done by a -- they were done 20 factors or ergonomics or that thing. 20 through -- through OSHA, but they were not done by OSHA. It was a -- it was a -- kind of 21 Q. What other certifications do you 21 22 hold? 22 an OSHA consultant that came in and gave the 23 2.3 training that issued the certification based A. Like, for example, I have -- I'm certified for -- I'm a certified forklift 24 on OSHA's requirements. 24 25 25 operator. I'm -- I've received certification Q. And the NRA you referenced

Page 34 Page 35 1 W. VIGILANTE 1 W. VIGILANTE 2 2 confined spaces and essentially asphyx -earlier, that's the National Rifle 3 3 Association? asphyxicating [sic] due to lack of oxygen or 4 4 other gases that may be present. A. Yes. 5 5 Q. Have you ever had a certification O. And the Fall Protection 6 withdrawn or disciplined in any way? 6 Certification, what is that? 7 7 A. No. A. That's -- again, it's a 8 8 Q. The certifying board -certification offered by OSHA for ensuring 9 that you are -- are familiar with and know the 9 A. Oh, I take that back. I think my 10 requirements and -- the safety requirements 10 Confined Space Certification has lapsed and for working at height. So I think -- I don't 11 it's possible my Fall Protection Certification 11 12 has lapsed. They require training every so 12 remember how -- what the minimum heighth is, 13 but if you're going to be up 20, 30, 40 feet 13 many years. Like you have to sit through a 14 working, you need to be tied in at all times 14 class every so many years, so I think they may have lapsed over time. 15 and there's different ways to do it. There's 15 16 different equipment to do it. So the 16 Q. You -- and I assume you let them 17 lapse; right, you didn't seek recertification? 17 certification ensures you have the training to A. I did not seek recertification. 18 know what the requirements are and what that 18 O. All right. What's Confined Space 19 equipment is and how the equipment's used. 19 20 20 Certification? What does that deal with? Q. All right. So is it a fair 21 A. Technically from a workplace 21 summary to say that certifications like fall 22 22 safety standpoint, OSHA standpoint, you can't protection and confined spaces, those that are 23 not the Board of Professional Ergonomics, 23 have people go into confined spaces without being certified to -- to go into them because 2.4 those are essentially testing to see whether 24 25 of the potential danger associated with 25 you're familiar with the various applicable Page 36 Page 37 1 W. VIGILANTE 1 W. VIGILANTE 2 regulations such as OSHA? 2 Q. Okay. During that -- so then 3 A. The way I would phrase it is that 3 looking back from 2003 to the present, you've 4 it's all part of a training package, and at 4 been involved in litigation-related the end of the training you're provided the 5 5 consulting; correct? 6 certification. The certification lets the 6 A. Sure. 7 people know that need to know that you've been 7 Q. What percentage of your time was 8 through the training, you've had the training 8 litigation-related consulting or expert work and that you've exercise -- or are able to 9 9 as opposed to what you've called "traditional demonstrate the knowledge from that training 10 10 consulting"? 11 so that they know that you're -- you're 11 A. When I was with Robson Forensic, 12 trained and appropriate for whatever the task 12 my billable hours percentage wise for 13 13 litigation versus non-litigation was probably may be. 14 Q. Over the last 13 year -- well, 14 on the order of 90, 95 percent litigation, 5, 15 prior to being at Vigilante Consulting dba 15 10 percent traditional consulting. Vigilante Forensics, you were with ROBE-SON 16 16 Q. All right. And so far, as we've Forensics or ROB-SON? How is it pronounced? 17 17 established under Vigilante Consulting, in 18 A. ROB-SON. 18 terms of revenue-generating activities, it's 19 Q. Okay. And in that role you also 19 been a hundred percent litigation? 20 did litigation-related work; correct? 20 A. Yes. 21 A. Yes. 21 Q. Have you -- and within that 22 litigation experience, what percentage has Q. Over -- and you were there for how 22 23 long? 23 been on behalf of plaintiffs seeking damages against a defendant as opposed to a defendant 24 A. Since July of 2003, so a little 24 25 over 12 years. 25 in a case?

Page 42 Page 43 1 W. VIGILANTE 1 W. VIGILANTE 2 2 New York or Connecticut back in maybe the 2004 ruling stand without making a comment as to 3 3 whether or not the State of Virginia time frame a judge found that my opinions were 4 not beyond the province of the jury, that the 4 recognized the field of human factors. field of psychology was nothing more than 5 5 O. So just so that we're clear on the record, in this last case you were describing, 6 common sense; therefore, he wouldn't let me 6 7 7 ultimately the highest court in the State of testify in the case. 8 8 Virginia said the Trial Court properly I had a case in Federal Court in 9 disallowed your testimony? 9 Virginia where the judge found that the hazard was an act of God, act of nature; and, MR. HAVERTY: Objection. 10 10 therefore, my assessment would not be allowed 11 11 A. That -to -- and the case would not be allowed to go 12 12 MR. HAVERTY: They ruled that they 13 forward. 13 didn't abuse its discretion. 14 14 A. Yeah, it's my -- I'm sorry. Another case in Virginia was 15 civil -- State Court where the judge -- it was 15 MR. HAVERTY: Go ahead. 16 a trip and fall case. A judge ruled that the 16 A. Yeah, my understanding of the 17 State of Virginia doesn't recognize the field 17 ruling was the State Supreme Court said it was or science of human factors; therefore, she in -- within the Trial Judge's discretion. 18 18 19 wouldn't let me testify. The ruling was 19 Q. And, therefore, the judge was appealed on appeal. The judge's -- trial proper in its ruling? 20 20 21 judge's decision was overturned. The 2.1 MR. HAVERTY: Objection, Dave. You 22 Appellate Court's decision was appealed to the 22 know that's not what that means. State Supreme Court. The Virginia State 23 23 A. I don't know what other than what Supreme Court said that it was in the trial 24 24 I've been told. I'm -judge's discretion; therefore, they let the 25 25 Q. Okay. Page 44 Page 45 1 1 W. VIGILANTE W. VIGILANTE Q. Okay. The Florida case was in 2. 2 A. So I can't agree with you or not 3 agree with you. I just know that that's what 3 what court? 4 4 A. It was in State Court somewhere the ruling was. 5 5 Q. Have you read the opinions in near Venice, Florida, which is the west side 6 б of Florida. I don't know if it was actually those cases? 7 7 A. I don't know that I ever seen an Venice or -- or -- or maybe Naples. I don't 8 8 -- I don't recall. opinion in the -- in that, the Virginia State 9 Court either at the Appellate level or the 9 Q. What was the name of the case? 10 10 A. I don't recall the plaintiff, and State Supreme Court level. 11 O. How about the other ones, the 11 the -- the defendant was something like You Do 12 other three? 12 It Aluminum or something like -- of that -- of 13 13 A. I don't think there was anything that nature. 14 written in the -- the case down in Florida. 14 Q. Do you know who the lawyer was on 15 the other side of that case? It was a decision at trial, time of trial. 15 16 16 The one -- the Daubert challenge in Virginia A. I do not. I've -- I've never seen the -- I don't think 17 Q. You were testifying or hoping to 17 testify on behalf of the plaintiff in that 18 I've seen the -- the ruling, a written ruling. 18 19 And I'm pretty sure at one time I did see that 19 case; correct? 20 a written ruling -- I -- I take that back. 20 A. I was retained on behalf of the 21 I'm pretty sure that the case in 2004 in 21 plaintiff in that case. Federal Court, I saw the transcript from the 22 Q. Okay. In the second case you said 22 hearing, the Daubert hearing. I wasn't 2.3 it was determined that your testimony would 23 not be helpful to the jury. Where was that present for it. So I do remember reading the 24 24 25 25 transcript at some point in time. case venued?

Page 46 Page 47 1 W. VIGILANTE W. VIGILANTE 1 2 A. Yeah, what I testified to was the 2 province of the jury, so he wasn't going to 3 3 judge said the field of psychology was nothing let me testify. That's the extent of my -- of 4 more than common sense, and my opinions were 4 my knowledge. 5 5 not beyond the province of a jury. That case Q. Okay. So you don't understand it 6 was venued in either Connecticut or New York. 6 beyond what you've just said? 7 A. That's correct. 7 O. You don't know which? 8 8 Q. Okay. And in the case in which A. I don't recall. 9 O. Federal or State? 9 the judge said the incident in question was 10 10 A. Federal. the act of God, I take it you were opining 11 Q. Do you know the name of the case? 11 that it was not an act of God; correct? A. It's Wald versus Costco. 12 12 A. No, there was a -- I was working 13 13 on behalf of the -- of the -- of the (Sneeze.) 14 A. God bless you. 14 plaintiffs. There was another expert in the Q. In any event -- and you don't 15 15 case also working on behalf of the plaintiff, understand that ruling to be that the judge 16 an engineer, and what our opinions were was 16 17 found that your testimony would not be helpful 17 that the -- the hazard that ended up injuring to the jury? You don't understand it that 18 18 the plaintiff was foreseeable to the 19 19 wav. defendants. 20 20 Q. And so why did the judge exclude A. I've already told you my 21 understanding. The judge in the trial -- in 21 your opinion? the hearing, I should say, commented that the 22 22 A. Yeah, he felt that the opinion -field of psychology was nothing more than 23 23 that the hazard was an act of God, therefore. 24 common sense; and the other comment he made 2.4 our analyses and opinions related to them were 25 was that my opinions would not be beyond the 25 inadmissible because it was a -- it was an act Page 48 Page 49 W. VIGILANTE 1 W. VIGILANTE 1 2 2 of God. their cars. As the crowd was making their way 3 Q. Okay. Were you taking a position 3 through the adjacent track and field area, a 4 that the incident was or wasn't an act of God? 4 gust of wind came in and picked the pole vault 5 A. I -- I don't believe I ever took 5 mat up and tumbled it down the track and it 6 6 struck multiple people; and one of those that position. 7 Q. Okay. What was the hazard 7 people were hurt badly, I guess, and that was 8 8 the -- the gist of the case. involved in that case? 9 A. The hazard was a -- the case 9 Q. And what was the opinion that you 10 10 gave in that case? involved a pole vault mat used for track and field. It was used outdoors where it was 11 A. The opinion, I believe, was that 11 12 marketed for on an outdoor track. The school. 12 the manufacturer of the pole vault mat knew or 13 should have known that the pole vault mat 13 I believe it was a high school, had left the 14 pole vault mat out. It was on a -- a --14 could be lifted and become a projectile under 15 what's the best way to describe it? A 15 heavy winds and foreseeable conditions and platform, a small -- a short platform to keep potentially injure someone. 16 16 it out of the mud and the -- the dirt and 17 O. And, therefore, should have done 17 everything to help prevent deterioration of 18 what? 18 19 the mat. 19 A. Provided warning and instruction 20 and/or the ability to strap the mat down, 20 The mat was left out during a --21 another event. I think -- I don't remember if 21 anchor the mat down, to inform their customers 22 it was a baseball game or a football game or 22 or users of the potential hazard and how to whatever, but a storm came in, a pretty 2.3 2.3 safeguard against it. Q. And where was that case venued? powerful storm came in, a thunderstorm came 24 24 25 25 in. The crowd was asked to take shelter in A. Virginia.

But when I worked for Robson Forensic, they had a a

Page 62 Page 63 W. VIGILANTE 1 W. VIGILANTE 1 2 2 for a plaintiff? old reports up on the website or offer them in 3 what they call "the white book" which is 3 A. If for the majority of -- of 4 essentially a three-ring binder with older 4 plaintiff cases that I'm retained in to assess 5 5 reports on it; and I don't recall if they were the adequacy of the warning, I would say the 6 redacted or if they were full reports. Again, 6 majority I've been able to find that the 7 7 I imagine they were redacted. So they would warning -- or I did find the warning was not 8 8 have been available to potential clients. adequate. That's, you know, that's kind of a roundabout 9 9 Q. You -- you were at 10 10 way of answering your question to make sure I Robson Forensics from 2003 until 2015; is that 11 did it completely. 11 right? 12 12 Q. Have you ever turned down a A. Correct. 13 litigation engagement on behalf of a plaintiff 13 Q. And your title there was 14 "associate"; is that right? 14 because you felt that the warning or instruction provided by the manufacturer was, 15 15 A. Yes. in fact, adequate? 16 Q. And in that 12 years that you were 16 17 A. I've had cases where I had to tell 17 there, you never made principal? 18 a client after they retained me that based 18 A. Yeah, I never made principal. 19 upon my analysis, I -- I couldn't find that 19 There was only -- when I arrived there, there was only the major partner, the founder of the the warning was inadequate. 20 20 21 Q. How often has that happened? 21 firm, Lance Robson, and then two part -- two A. Every now and again. 22 partners that were the area managers in 22 O. Usually in the majority of cases 23 Lancaster and Cedar Knolls that each owned 15 23 24 you find that the warning or instruction was 2.4 percent of the -- of the company. The not adequate when asked to opine on that topic 25 25 owner -- the -- the founder owned the bulk Page 64 Page 65 W. VIGILANTE 1 1 W. VIGILANTE 2. 2 majority of it and then there was money or A. Well, I think that Bart Eckhardt 3 shares set aside for ESOP, Employee Stock 3 is the owner of the company now. He bought 4 Option Program. 4 the company. Him and his wife bought the 5 5 The owner eventually bought those shares from Lance Robson a number of years 6 two partners out, brought in a CEO or promoted 6 ago, maybe two or three, and at that point I 7 7 a CEO, and when he promoted the CEO, he gave think he changed his name from CEO/President that CEO 5 percent of the company. And then 8 8 to Principal. 9 that was the way the company was owned until 9 Q. In your current employment with or 10 the founder sold the company to the CEO and work with Vigilante Consulting dba Vigilante 10 his wife. And so currently I believe the only 11 Forensic, other than this one case you 11 two shareholders are the CEO and his wife and 12 mentioned, have you ever rendered an opinion 12 13 that a manufacturer's instructions or warnings then the ESOP, Employee Stock Option Program. 13 14 were adequate? 14 Q. Were you in the ESOP? 15 A. I'm sorry, 'cause you kind of lost 15 A. Yes. 16 Q. Did anybody become a principal 16 me in the question. 17 O. Sure. I think you said that since 17 during the time you were there? the time you formed Vigilante Consulting 18 18 A. Yeah, so if principal you mean shareholder, it would have been the CEO and 19 you've rendered one opinion, it hasn't been 19 20 disclosed yet, that a manufacturer's warning 20 his wife. 21 21 or instruction was adequate; correct? Q. Okay. Do you have an 22 A. I think that's -- I've only been understanding -- 'cause that -- that phrase is 22 2.3 retained by one manufacturer defendant since used on Robson's website, "principal." 23 24 24 Do you have an understanding of August in a product warnings case. I think 25 that's accurate. 25 what they mean by that phrase?

2	and so forth.	2	A. Oh, yes, I do, yeah.
3	The technical reports that are	3	Q. By my count you have testified 46
4	listed on Pages 8 through 10 were IBM internal	4	times at least as listed in the last four
5	technical reports, and that peer-review	5	years.
6	process was a little bit different. They were	6	Does that sound right to you?
7	given to other professionals in the the	7	A. I'd have to count them, but I mean
8	department who knew where the technical	8	that's probably probably in that ballpark.
9	reports would come from. They were approved	9	Q. Which you would roughly plan
10	by management and so forth before they were	10	A. I I have to
11	released for publication as a technical report	11	Q. Oh. Go ahead.
12	in IBM.	12	A. Just a clarification. I don't
13	Q. Okay. So those were all peer	13	know that I have the four-year testimony
14	reviewed internally at IBM?	14	history that was submitted with the report. I
15	A. Yes.	15	have the updated one, so I'm happy to produce
16	Q. Okay. I don't have a copy with	16	that too. When I was preparing for the
17	me, but I suspect you have a copy accessible	17	deposition, I change them as I go through
18	to you which is the portion of your report	18	depositions and so forth, so they're updated;
19	that deals with your expert testimony by	19	and I don't know that this report was
20	deposition or trial.	20	submitted in April and my current date on my
21	Do you have that available to you?	21	list is August, so there's probably some
22	A. I'm sorry. What	22	change.
23	Q. Do you have that with you?	23	Q. Okay. Well, why don't you, as
24	MR. HAVERTY: List of testimony.	24	you're looking at your current testimony, what
25	Q. Your list of testimony.	25	testimony do you have since April of 2016?
	Page 72		Page 73
1	W. VIGILANTE	1	W. VIGILANTE
2	A. There was a Denise Pender versus	2	any kind in ergonomics or human factors?
3	Florida East Coast Railway in April.	3	A. I'm not aware of any licenses.
4	Joseph and Ursy Vitale versus	4	I'm aware of the certification through the
5	Electrolux Home Products in April.	5	Board of Certification For
6	Anita Malone versus K&G Mens	6	Q. Right.
7	Company.	7	A Professional Ergonomists.
8	Q. Hold on. Yeah. I'm sorry. You	8	Q. All right. Have you ever been
9	just got to go a little bit slower.	9	terminated from a position as a human factors
10	A. Sure.	10	professional or an ergonomics professional?
11	Q. Yeah, why don't we why don't	11	A. No.
12	we I'll tell you what, why don't we do	12	Q. Have you ever been relieved of an
13	this? Why don't we, if you're willing to,	13	engagement as an expert witness by your
14	just mark a copy of that at a break.	14	client?
15	A. Sure, absolutely.	15	A. I think I know what you mean, so
16			any time the ease is even I'm released Dut
	Q. Okay. In general, though, you	16	any time the case is over, I in released. But
17	Q. Okay. In general, though, you would agree that by these numbers you are on	16 17	any time the case is over, I'm released. But I've been involved in cases where I can't give
17 18			
18 19	would agree that by these numbers you are on	17 18 19	I've been involved in cases where I can't give

I I maybe sometimes a little more, sometimes a little bit less. That's probably about right.	17 18 19 20 21 22 23	I've been involved in cases where I can't give a favorable opinion that I'm asked by the client not to do any more work, so I submit a final bill and and that's it. I typically close the case. So that happens.  Q. Other than those two circumstances when you are unable to give a helpful opinion

Page 74 Page 75 1 W. VIGILANTE W. VIGILANTE 1 2 parlance. Have you ever been fired by a 2 A. Features, design features, 3 client? 3 presentation of information on 4 4 over-the-counter medication labeling. That A. Not -- no. Q. Let's talk about your medical 5 5 was in the mid to the late '90s. 6 device experience in particular. 6 And then I worked on a -- well, my 7 You -- you've never been employed 7 dissertation was on the presentation of risk 8 by a medical device manufacturer: correct? 8 and benefit information on direct-to-consumer 9 A. No. I'm sorry. Correct. 9 advertisements of prescription medications on Q. Correct. Okay. And you've never 10 10 the web, and I was -- that was for my been hired by the Food and Drug Administration 11 11 dissertation. 12 to consult on any medical devices? 12 Q. Okay. Did the FDA have some 13 A. Not on any medical devices. 13 involvement in your dissertation? 14 Q. Okay. Are you -- have you been A. Yes. After -- the lab I worked in 14 15 retained by the Food and Drug Administration 15 at North Carolina State University, the to consult regarding pharmaceuticals? Cognitive Ergonomics Lab, we did a lot of 16 16 17 A. I've never been hired, but I have 17 research in warnings and risk perception; and worked in consultation with the FDA on one area was that a significant area of work 18 18 19 research related to pharmaceuticals. 19 done by the lab was related to medication Q. How many times? 20 20 labeling and presentation of information for 2.1 A. I did two large projects that I 21 over-the-counter prescription medications. 22 cooperated with the FDA on. One was on So in the '90s we were working 22 formatting features and factors for with the FDA on areas in which they wanted 23 23 24 over-the-counter medication labeling. 2.4 research done. So it was a way to come up Q. Formatting what? I'm sorry. 25 25 with research projects that would be useful, Page 76 Page 77 1 W. VIGILANTE W. VIGILANTE 1 2. 2 you know, in the real world. So we did a because there was some loose interpretation of 3 number of studies related to the formatting 3 the equal time clause in the -- in the new 4 features of over-the-counter medication 4 regulations. So as a lab we looked at 5 labeling and the ordering of information 5 direct-to-consumer ads on the web which was 6 presented on over -- over-the-counter б the hunk of research that I was running, but also in print ads and also on television ads. 7 7 medication labeling. The results of that 8 information was fed back to the FDA and used 8 So colleagues of mine at NC State 9 in their regulatory process to come up with 9 led the -- a different person lead the 10 10 television advertisements and a third led the requirements for the presentation of information on over-the-counter medication 11 research done on the print ads. And then 11 12 labeling which, I believe, they put forth in 12 when -- as we were finding our -- coming to 13 our findings, we were feeding that back in to 13 1999. 14 After doing the OTC stuff, we were 14 our contacts at the FDA for use in their 15 15 looking for other projects; and our contacts regulatory process. at the FDA, in consultation with them, asked 16 Q. Okay. Let me drill down on those 16 them if -- asked us if we can do work related 17 for a second. 17 to direct-to-consumer advertisements because 18 First of all, you've identified 18 19 in the late '90s that was becoming -- I think 19 two projects, right, one with formatting 20 there was a change in the regulation or the 20 features on the labels attached to law allowing pharmaceutical companies to 21 21 over-the-counter medications themselves; 22 advertise directly to consumers, and there was 22 right? a question over how they were doing that and 2.3 A. Well, I would say there was two 2.3 how they were presenting risk and hazard 24 areas of work that we did. One was DT -- DTC. 24 information and compared to the benefits 25 25 direct-to-consumer advertisement, and the

	Page 78	70	Page 79

Q. So going back let's let's break this down. Going back to the work you did with respect to over-the-counter labeling in the mid to late 1990s, that was work you did as a graduate student? A. Yes. Q. So you were doing it under the supervision of a faculty member at North Carolina State?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	W. VIGILANTE and my guess is, is that was probably based upon work I was doing for my dissertation. Sometimes there's a lag between finishing the work, getting the dissertation done, the technical reports done and then getting it published. It's harder to get it published in a peer-reviewed journal, so it sometimes takes longer and there's a lag.  Then I did a project with in 2007 on direct-to-consumer prescription drug advertisement on television and online purchases of medications. That was not related to my dissertation.  Q. Was the FDA involved in that project?  A. I don't know.  Q. Okay. Going back to the formatting labels on over-the-counter medication that was done in 1990s, mid to late '90s, first of all, that was when you were a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	W. VIGILANTE information on websites. Q. Direct to consumer? A. Correct. But a a student that was helping me with the project, a junior student at the time continued that work, and I believe that I helped him with his continuation of work after, you know, graduating and moving on and what have you; and that's my part in that was published in 2005, I believe. Q. So going back let's let's break this down. Going back to the work you did with respect to over-the-counter labeling in the mid to late 1990s, that was work you did as a graduate student? A. Yes. Q. So you were doing it under the supervision of a faculty member at North Carolina State? A. Sure. I had an academic advisor.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	W. VIGILANTE and my guess is, is that was probably based upon work I was doing for my dissertation. Sometimes there's a lag between finishing the work, getting the dissertation done, the technical reports done and then getting it published. It's harder to get it published in a peer-reviewed journal, so it sometimes takes longer and there's a lag.  Then I did a project with in 2007 on direct-to-consumer prescription drug advertisement on television and online purchases of medications. That was not related to my dissertation.  Q. Was the FDA involved in that project?  A. I don't know. Q. Okay. Going back to the formatting labels on over-the-counter medication that was done in 1990s, mid to late '90s, first of all, that was when you were a graduate student; right?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	W. VIGILANTE information on websites. Q. Direct to consumer? A. Correct. 	Page 82		Page 83
1	W. VIGILANTE	1	W. VIGILANTE
2	contract with the FDA?	2	A. Yeah, I don't know.
3	A. I don't believe so.	3	Q. Okay.
4	Q. Did the FDA sponsor that research?	4	A. But they were I believe we
5	A. They did not sponsor it in that	5	submitted a request for grant money
6	they provided monetary value for it. Again,	6	Q. From the DIA?
7	we were in consultation with them. I believe	7	A to the DIA.
8	that the Drug Information Association funded	8	Q. Yep.
9	the projects for the OTC stuff and then	9	A. And then we had received monies
10	provided some funding for the the	10	for the OTC stuff and the direct-to-consumer
11	direct-to-consumer advertisement research that	11	advertisement stuff, and that's that's all
12	we did after the OTC stuff	12	I could recall.
13	Q. And what's	13	Q. Okay. And so the studies were
14	A or at the end of the OTC stuff.	14	done funded by the DIA, and not requested
15	Q. What's the Drug Information	15	by the FDA; correct?
16	Association?	16	A. No. Well, two things. The DIA
17	A. My understanding it was a	17	money was not enough to fully fund all the
18	consortium of manufacturers in the	18	projects. It was used to help purchase some
19	pharmaceutical industry.	19	equipment that was used in the multiple
20	Q. Okay. So if I understand this	20	studies, but it wasn't typically like if
21	right, the Drug Information Association had	21	you get a grant researching a specific topic,
22	research performed, I assume, probably not	22	you can apply to a a grant organization,
23	just at North Carolina State, correct	23	maybe the Federal government, and they can
24	A. I I	24	provide you with enough money to fund the
25	Q as far as you know?	25	project fully where they're they're paying
	7. 04		5 05

2	for the research work, the researchers.	2	research; correct?
2	for the research work, the researchers. They're paying for the the lead	2 3	research; correct?  A. I can tell you I don't know. I
2 3 4	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes,	2 3 4	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer
2 3 4 5	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the	2 3 4 5	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project
2 3 4 5 6	for the research work, the researchers. They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the	2 3 4 5 6	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about
2 3 4 5 6 7	for the research work, the researchers. They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present	2 3 4 5 6 7	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my
2 3 4 5 6 7 8	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind	2 3 4 5 6 7 8	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter
2 3 4 5 6 7 8 9	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded	2 3 4 5 6 7 8 9	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?
2 3 4 5 6 7 8 9	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.	2 3 4 5 6 7 8 9	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at
2 3 4 5 6 7 8 9 10	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully	2 3 4 5 6 7 8 9 10 11	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I
2 3 4 5 6 7 8 9 10 11	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant	2 3 4 5 6 7 8 9 10 11	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how
2 3 4 5 6 7 8 9 10 11 12 13	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was	2 3 4 5 6 7 8 9 10 11 12	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.
2 3 4 5 6 7 8 9 10 11 12 13	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted	2 3 4 5 6 7 8 9 10 11 12 13	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.  Second part is, is that the work	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.  Q. Okay. As far as you know, the FDA
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.  Second part is, is that the work was done in conjunction with our contacts at	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.  Q. Okay. As far as you know, the FDA did not solicit the research; correct?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.  Second part is, is that the work was done in conjunction with our contacts at the FDA asking them what type of issues do	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.  Q. Okay. As far as you know, the FDA did not solicit the research; correct?  A. I don't know.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	for the research work, the researchers. They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.  Second part is, is that the work was done in conjunction with our contacts at the FDA asking them what type of issues do they do they see, what type of research is	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.  Q. Okay. As far as you know, the FDA did not solicit the research; correct?  A. I don't know.  Q. Okay. And you don't know because
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.  Second part is, is that the work was done in conjunction with our contacts at the FDA asking them what type of issues do they do they see, what type of research is needed, what are ideas for research projects.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.  Q. Okay. As far as you know, the FDA did not solicit the research; correct?  A. I don't know.  Q. Okay. And you don't know because the research was overseen by and requested by
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.  Second part is, is that the work was done in conjunction with our contacts at the FDA asking them what type of issues do they do they see, what type of research is needed, what are ideas for research projects. So that was the extent of our collaboration	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.  Q. Okay. As far as you know, the FDA did not solicit the research; correct?  A. I don't know.  Q. Okay. And you don't know because the research was overseen by and requested by the DIA; correct?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.  Second part is, is that the work was done in conjunction with our contacts at the FDA asking them what type of issues do they do they see, what type of research is needed, what are ideas for research projects. So that was the extent of our collaboration with the FDA; and then, of course, feeding	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.  Q. Okay. As far as you know, the FDA did not solicit the research; correct?  A. I don't know.  Q. Okay. And you don't know because the research was overseen by and requested by the DIA; correct?  MR. HAVERTY: Objection.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.  Second part is, is that the work was done in conjunction with our contacts at the FDA asking them what type of issues do they do they see, what type of research is needed, what are ideas for research projects. So that was the extent of our collaboration with the FDA; and then, of course, feeding that data back to the FDA, our contacts at the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.  Q. Okay. As far as you know, the FDA did not solicit the research; correct?  A. I don't know.  Q. Okay. And you don't know because the research was overseen by and requested by the DIA; correct?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	for the research work, the researchers.  They're paying for the the lead investigator to maybe not take some classes, not teach some classes. They pay for the the participants. They pay for all the equipment. They may pay for travel to present the data and the information. So that's kind of a fully funded grant, a fully funded project under a grant.  The DIA did not provide us fully funded grant money. They provided us grant money to help run the projects. So there was multiple projects going on. So I just wanted to make that clear.  Second part is, is that the work was done in conjunction with our contacts at the FDA asking them what type of issues do they do they see, what type of research is needed, what are ideas for research projects. So that was the extent of our collaboration with the FDA; and then, of course, feeding	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	research; correct?  A. I can tell you I don't know. I can tell you that for my direct-to-consumer project  Q. Right now we're not talking about direct-to-consumer. Okay? Right now my questions are related to the over-the-counter labeling. Okay?  A. Yeah. I'm I'm sorry. So at at that the over-the-counter labeling, I don't I don't recall. I can tell you how the DTC stuff got started.  Q. We'll get to that.  A. Yeah.  Q. Okay. As far as you know, the FDA did not solicit the research; correct?  A. I don't know.  Q. Okay. And you don't know because the research was overseen by and requested by the DIA; correct?  MR. HAVERTY: Objection.  A. No. That's not correct.

Page 86 Page 87 W. VIGILANTE 1 W. VIGILANTE 1 2 2 that we put in a grant request to the DIA for Q. I'll get to the DTC stuff in a 3 3 the research topics that we had come up with second. I'm still focussing on the 4 it and they provided us money to partially 4 over-the-counter labeling. Okay? 5 5 fund the projects. The topics came up in A. Sure. 6 conjunction with discussions with the FDA and 6 Q. Okay. That research was not 7 7 the contacts we had at the FDA. So that's -directed by FDA. 8 8 I think that's the, you know, the overall A. Yeah, there was no directive that said "You must do this." Again, it was in 9 history of it. 9 10 10 Q. When you say the context we -collaboration, discussions with the FDA as to what research and what things they were doing 11 "contacts we had at the FDA," who's the "we" 11 12 in that sentence, North Carolina State 12 and research they could use; and that's how we 13 13 decided on research projects. University? 14 Q. Well, and when you say 14 A. Well, I would have been through contacts with it through my advisor, Mike 15 "collaboration," that collaboration was 15 Wogalter at the time; and then I had two 16 initiated not by FDA but by North Carolina 16 17 contacts in -- I was trying to explain -- with 17 State University; right? the DTC. When I was looking for a 18 18 A. Yeah, I said three times I don't 19 dissertation subject I contacted them. I 19 know. said, "Hey, it's Bill Vigilante, you know, I'm 20 20 Q. Okay. It was not -- and that 21 looking to put together a dissertation. Do 21 collaboration -- well, did you deal directly you have areas of study that you think would 22 22 with the FDA? be of interest and use to the FDA," and that's 23 23 A. For the OTC stuff, at the latter 24 where they -- they pointed -- pointed us into 2.4 part of the project, I did, but not at the 25 the DTC stuff. 25 start of the project. Page 88 Page 89 1 W. VIGILANTE 1 W. VIGILANTE 2. 2 the OTC stuff I know that it was directly Q. What was the nature of your direct 3 dealings with FDA at the latter part of the 3 implemented in their regulations for the 4 OTC project? 4 labeling. For example, I know that there's a 5 5 A. Well, one of the things that I did requirement for a minimum of 8 point font. 6 6 was send them my research; and then back in That came directly out of our research. That 7 2003, I think the fall of 2003 my contact 7 was one of our recommendations. There was 8 8 asked me to come and give a -- a presentation a -- an order of the -- of the information, an 9 to the FDA and the committee that was sitting 9 ordering of the information to be presented on for the OTC stuff. So I put together a 10 the labels; and I do know that it was followed 10 presentation. I sent it down to them and 11 directly on the result of my research except 11 unfortunately I -- I came down with a stomach 12 for the presentation of active ingredients, 12 13 bug, so my -- a colleague of mine who was down that they got pushback from the pharmacists 13 there giving another presentation gave my --14 and the doctors. They wanted that higher in 14 15 the list. And I know of no other research in gave my presentation as well. 15 the country that was done on the -- the 16 Q. Okay. And that presentation 16 17 ordering of information for 17 involved whatever the outcome of your research 18 direct-to-consumer -- or over-the-counter 18 was? 19 medication labeling. 19 A. Yes, in the -- whatever the 20 There is recommendations for white 20 findings from the research was, and I -- I space that came out of the research that was 21 don't recall at the time if that was DTC or 21 22 put into the regulations. There was the 22 OTC. I just don't recall. 23 recommendation for foldout labels to present 23 Q. Okay. And you don't know what FDA 24 did internally with your research? 24 or have larger real estate to present the 25 information in a more and better format using 25 A. For the DTC stuff, I don't. For

	Page 90		Page 91
1	W. VIGILANTE	1	W. VIGILANTE
2	bullet lists, using extra white space, using	2	other than what we were doing
3	relatively larger fonts, et cetera; and,	3	Q. Well, whether published
4	again, that was something that wasn't directly	4	A and that I was doing at the
5	from our recommendations that were were put	5	time.
6	forth by the FDA and is used now.	6	Q or not, do you know whether it
7	Q. Did you say "directly from your	7	came exclusively from your research?
8	research" or "not directly from your	8	A. Yeah, I can't say that a
9	research"?	9	another organization somewhere had results
10	A. It	10	that they didn't publish to the public that
11	Q. I just didn't hear you.	11	were submitted to the to the FDA, but I'm
12	A. At what point?	12	not aware of it.
13	Q. Just now you said and that that	13	Q. Okay. There's no reason why you
14	the FDA took that directly from your research	14	would be aware of them, is there, if
15	or not directly from your research. I just	15	information was given to the FDA?
16	didn't hear you.	16	A. If it was non-public information
17	A. Yeah, the rec the	17	that was given to the FDA, I can't say that
18	recommendation was directly from our	18	I'm sure they would send it over to us. Maybe
19	research	19	it was confidential if it existed. I would
20 21	Q. Okay.	20	think that if it was presented to the FDA and
22	A with regard to those topics.	21 22	it wasn't confidential, they would send it up to us to at least take a look at to let us
23	Q. Do you know if it was exclusively	23	
23 24	from your research?  A. I don't know of any other research	24	know what other people were doing. Typically that's how research works. You want to be
25	that was published related to those topics	25	able to collaborate between different groups
23	that was published related to those topics	23	able to conaborate between universit groups

We looked at even leading between the between the lines which is related to to white space and the ordering of information. Q. Okay. On the direct-to-consumer marketing materials, your part of the research was related to TV advertisements? A. I did help in the TV advertisements, but my major project was on website advertisements. Q. Oh, okay. And was that research requested by FDA? A. Yeah, so what happened was is that I contacted the FDA, my contacts at the FDA, and asked them, you know, what areas
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	and parties so that you're not stepping on each other's toes, you get an idea of what's being done, pitfalls that may be out there that may need to be addressed and so forth.  Q. Typically that's how FDA research is done, is that your testimony?  A. No, that's typically how research is done.  Q. Right. But you don't know how, typically, FDA research is done?  A. I don't know how it was for the work that we were doing on the OTC and DTC stuff, I don't know how the FDA was getting information from other parties and if there was information from other parties that related related to the topics that we were working on.  Q. And in any event, the recommendations that were in your research	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	W. VIGILANTE Q correct? MR. HAVERTY: There's more. A. Yeah, so we looked at the font size. We looked at the white spacing. We looked at using bulleted list versus paragraph prose. We looked at extended label designs. We looked at even leading between the between the lines which is related to to white space and the ordering of information. Q. Okay. On the direct-to-consumer marketing materials, your part of the research was related to TV advertisements? A. I did help in the TV advertisements, but my major project was on website advertisements. Q. Oh, okay. And was that research requested by FDA? A. Yeah, so what happened was is that I contacted the FDA, my contacts at the FDA,

I had a a colleague at Robson that was doing some medical device submission work, testing work, submission work, and she used to get overloaded in her work and she would ask colleagues to help her go through data or whatever, and I've I've helped her	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. Okay. But it was a project that was someone else at Robson was retained to do for the medical device manufacturer?  A. Yes. Q. All right. In your litigation work, whether at Robson or at Vigilante Forensics, have you ever been hired by a medical device manufacturer?  A. None are coming to mind. Q. Okay. Other than this case, have you ever been retained on behalf of a plaintiff suing a medical device manufacturer?  A. None are coming to mind, but I have a a feeling that I did at least consult on one case involving a medical product, but it's very, very fuzzy, and I
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. Yes. A. I have not. Q. Okay. Or just to be clear and complete, work on a project for someone who was retained by a medical device manufacturer. A. That one gets a little bit more fuzzy. Q. Okay. Why don't you explain that to me? A. I had a a colleague at Robson that was doing some medical device submission work, testing work, submission work, and she used to get overloaded in her work and she would ask colleagues to help her go through data or whatever, and I've I've helped her on those parts, but I can't really get into	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. Okay. But it was a project that was someone else at Robson was retained to do for the medical device manufacturer? A. Yes. Q. All right. In your litigation work, whether at Robson or at Vigilante Forensics, have you ever been hired by a medical device manufacturer? A. None are coming to mind. Q. Okay. Other than this case, have you ever been retained on behalf of a plaintiff suing a medical device manufacturer? A. None are coming to mind, but I have a a feeling that I did at least consult on one case involving a medical product, but it's very, very fuzzy, and I don't have a specific memory of it.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. Yes. A. I have not. Q. Okay. Or just to be clear and complete, work on a project for someone who was retained by a medical device manufacturer. A. That one gets a little bit more fuzzy. Q. Okay. Why don't you explain that to me? A. I had a a colleague at Robson that was doing some medical device submission work, testing work, submission work, and she used to get overloaded in her work and she would ask colleagues to help her go through data or whatever, and I've I've helped her on those parts, but I can't really get into exactly what it was that I was reviewing or	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. Okay. But it was a project that was someone else at Robson was retained to do for the medical device manufacturer? A. Yes. Q. All right. In your litigation work, whether at Robson or at Vigilante Forensics, have you ever been hired by a medical device manufacturer? A. None are coming to mind. Q. Okay. Other than this case, have you ever been retained on behalf of a plaintiff suing a medical device manufacturer? A. None are coming to mind, but I have a a feeling that I did at least consult on one case involving a medical product, but it's very, very fuzzy, and I don't have a specific memory of it. Q. Okay. So it's not it's not
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. Yes. A. I have not. Q. Okay. Or just to be clear and complete, work on a project for someone who was retained by a medical device manufacturer. A. That one gets a little bit more fuzzy. Q. Okay. Why don't you explain that to me? A. I had a a colleague at Robson that was doing some medical device submission work, testing work, submission work, and she used to get overloaded in her work and she would ask colleagues to help her go through data or whatever, and I've I've helped her on those parts, but I can't really get into exactly what it was that I was reviewing or doing for her at the time. I just don't	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. Okay. But it was a project that was someone else at Robson was retained to do for the medical device manufacturer?  A. Yes.  Q. All right. In your litigation work, whether at Robson or at Vigilante Forensics, have you ever been hired by a medical device manufacturer?  A. None are coming to mind.  Q. Okay. Other than this case, have you ever been retained on behalf of a plaintiff suing a medical device manufacturer?  A. None are coming to mind, but I have a a feeling that I did at least consult on one case involving a medical product, but it's very, very fuzzy, and I don't have a specific memory of it.  Q. Okay. So it's not it's not certainty whether you have or you haven't?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. Yes. A. I have not. Q. Okay. Or just to be clear and complete, work on a project for someone who was retained by a medical device manufacturer. A. That one gets a little bit more fuzzy. Q. Okay. Why don't you explain that to me? A. I had a a colleague at Robson that was doing some medical device submission work, testing work, submission work, and she used to get overloaded in her work and she would ask colleagues to help her go through data or whatever, and I've I've helped her on those parts, but I can't really get into exactly what it was that I was reviewing or doing for her at the time. I just don't recall.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. Okay. But it was a project that was someone else at Robson was retained to do for the medical device manufacturer?  A. Yes.  Q. All right. In your litigation work, whether at Robson or at Vigilante Forensics, have you ever been hired by a medical device manufacturer?  A. None are coming to mind.  Q. Okay. Other than this case, have you ever been retained on behalf of a plaintiff suing a medical device manufacturer?  A. None are coming to mind, but I have a a feeling that I did at least consult on one case involving a medical product, but it's very, very fuzzy, and I don't have a specific memory of it.  Q. Okay. So it's not it's not certainty whether you have or you haven't?  A. Correct.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Yes. A. I have not. Q. Okay. Or just to be clear and complete, work on a project for someone who was retained by a medical device manufacturer. A. That one gets a little bit more fuzzy. Q. Okay. Why don't you explain that to me? A. I had a a colleague at Robson that was doing some medical device submission work, testing work, submission work, and she used to get overloaded in her work and she would ask colleagues to help her go through data or whatever, and I've I've helped her on those parts, but I can't really get into exactly what it was that I was reviewing or doing for her at the time. I just don't recall. Q. It was a number of years ago?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Okay. But it was a project that was someone else at Robson was retained to do for the medical device manufacturer? A. Yes. Q. All right. In your litigation work, whether at Robson or at Vigilante Forensics, have you ever been hired by a medical device manufacturer? A. None are coming to mind. Q. Okay. Other than this case, have you ever been retained on behalf of a plaintiff suing a medical device manufacturer? A. None are coming to mind, but I have a a feeling that I did at least consult on one case involving a medical product, but it's very, very fuzzy, and I don't have a specific memory of it. Q. Okay. So it's not it's not certainty whether you have or you haven't? A. Correct. Q. All right. Are you familiar with
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. Yes. A. I have not. Q. Okay. Or just to be clear and complete, work on a project for someone who was retained by a medical device manufacturer. A. That one gets a little bit more fuzzy. Q. Okay. Why don't you explain that to me? A. I had a a colleague at Robson that was doing some medical device submission work, testing work, submission work, and she used to get overloaded in her work and she would ask colleagues to help her go through data or whatever, and I've I've helped her on those parts, but I can't really get into exactly what it was that I was reviewing or doing for her at the time. I just don't recall. Q. It was a number of years ago? A. Yes.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. Okay. What's the name of the standard? Q. Medical Devices, Application of Risk Management to Medical Devices. A. I'm not familiar with it. Q. Okay. Are you familiar with IEC 60601-1-6:2010, Collateral Standard on Usability?  A. I'm not familiar with it. Q. Are you familiar with IEC 62366:2007, Medical Devices, Application of Usability Engineering in Medical Devices? A. I don't believe I read it. Q. Are you familiar with ANSI, A-N-S-I, slash, Aami He752009, Human Factors Engineering, Design of Medical Devices? A. I don't recall if I read that or not. Q. Have you ever performed a formal	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	W. VIGILANTE  A. For a medical product or any product?  Q. Well, let's start with a medical product.  A. I have not for a medical product.  Q. Okay. Have you performed a formal risk analysis for some other product?  A. For consumer and commercial products I have.  Q. Okay. Consumer and commercial products, you're distinguishing those from medical devices; correct?  A. Sure.  Q. Okay. What process or methodology have you used to perform a formal risk analysis?  A. The risk analysis I've been involved with were during my time at IBM in product development. It was integrated into the product development cycle and in different parties that were different members of the Product Development Team fed into the risk analysis. It was run and overseen by		

Page 110 Page 111 W. VIGILANTE 1 W. VIGILANTE 1 2 2 For my part, the product, both the A. I had a -- I've worked on the 3 3 concept and then once the concept was put into design development of laptops, desktops, 4 more physical form, was assessed for potential 4 monitors, input devices such as keyboards, 5 5 errors, potential hazards, potential problems. mice, scanners, printers. I've worked on 6 That was fed back into the risk assessment 6 wireless devices, whether 802.11, Bluetooth. 7 7 based upon the user's standpoint, the -- the I worked on storage, tape storage, desktop 8 8 product user's standpoint. tape storage, commercial storage, tape The Engineering Teams, the Testing 9 libraries, tape library pickers. Even worked 9 10 Teams all fed back into the -- the risk 10 on cameras at one point. So I think that's 11 assessment based upon their disciplines and 11 a -- kind of a good cross-reference of the 12 their types of testing and -- and data that 12 different types of products I've worked on. 13 13 Q. What was your role with respect to they collect. 14 those -- well, actually, let me back up. 14 Q. Those risk analyses that you were 15 involved in were during your time at IBM I 15 How many such risk analyses did think you said? you participate in at your -- in your time at 16 16 17 A. Yes. 17 IBM? 18 Q. So they involved computer 18 A. I don't have a number for you. 19 19 Generally it would be done during the product software? design function. So if there were existing 20 20 A. I don't think I've done one for 21 computer software. It was mostly for 21 products that we're making cosmetic or minor 22 22 changes to, we wouldn't go through a full risk hardware. 23 23 Q. Computer hardware? analysis. It would only be products that 24 2.4 we're developing either a new platform or a A. Yes. 25 Q. Such as? Give me an example. 25 brand new product, like bringing a brand new Page 112 Page 113 1 1 W. VIGILANTE W. VIGILANTE 2. 2 product to market where it would be done. So working with warranty and service to identify 3 I've worked on maybe over two dozen to three 3 post-release problems that, you know, were not 4 dozen products that fit that category. 4 foreseen. 5 Q. Okay. And was your role -- let me 5 So that's my role in the 6 see if I can come at it a different way. 6 Development Teams. 7 7 Were you looking at these products Q. Well, what I was trying to get at 8 is with respect to those products at IBM, were 8 from the standpoint of primarily being you attempting to analyze the potential for 9 concerned with repetitive stress injuries or 9 10 what were you looking at? injury? 10 A. My role in the Product Development 11 A. On some of the products potential 11 12 Team was the User Centered Design Team Lead. 12 for injury was a focus. Most -- all of the 13 products usability and user error and So I was responsible for the human factors, 13 the ergonomics, the usability. So I had an 14 potential damage to the machine was my focus. 14 15 Q. What kind of injuries did you assigned role on the teams, and my job was to 15 evaluate? 16 represent the user. So I worked for the 16 17 A. For the smaller products, the 17 Design Team representing the user through all 18 biggest problem I had to worry about was sharp 18 stages of -- of the design process from initial requirements gathering, the concept 19 edges, and that's usually picked up by the 19 20 manufacturing folks, but when I get into 20 development, to initial prototypes, to the testing if it was -- if there was an issue, I 21 testing concepts, testing prototypes, getting 21 22 would identify it, mark it, and have it get physical products working, testing those with 22 2.3 fixed. 23 users and different usability techniques to 24 24 validation and competitive benchmarking for For the bigger products, like the 25 tape library -- not the -- the tape libraries. 25 the products; and then watching warranty and

Page 114 Page 115 1 W. VIGILANTE 1 W. VIGILANTE 2 The tape libraries with the pickers we had 2 responsibility was doing it through usability 3 3 issues with the fact that we have large moving testing, identifying issues that came up 4 robotic arms on tracks that can crush and 4 during task analysis, issues during the -- the 5 injure people. So there was issues related to 5 assessment of the prototypes, issues that were 6 crush hazards with the tape libraries; and the 6 identified during the -- the user testing. 7 7 large tape storage or the large storage units That -- that's where my focus was. 8 8 our biggest issue was with the electric --O. Okay. So -- and your focus, to 9 electric shock and electrocution. So we had 9 the extent it was on usability testing, would 10 to identify potential is risks associated with 10 involve both task analysis and then the 11 the fact that they were high-voltage machines 11 usability side of it; correct? 12 that both the typical user and the servicer 12 A. Well, there were multiple tools 13 and the installer had to access, and at 13 that I utilized working for IBM doing these, the product assessment; and it would be my 14 different points in time at different parts of 14 15 responsibility as -- as opposed to that --15 that access they may be exposed -- or the -the job was to prevent them from being exposed 16 that it be done and -- and done correctly as 16 17 to the high-voltage areas of the machine. 17 opposed to be the sole person doing it. But 18 Q. Okay. Did -- in the -- in the 18 usability testing, focus groups, the cognitive 19 risk analyses processes that you were involved 19 walk-throughs, the -- the hallway testing, the 20 in, was there a particular methodology of risk 20 task analysis, you know, these were all 21 analysis that was utilized? 21 different tools that were -- that I utilized 22 A. Well, there was. Like for the --22 depending upon what pay -- what stage of the development process the product was in, what 23 more of the engineering side the FMEAs were 23 practiced, the failure modes effect analysis stage of the development process the 2.4 24 25 were done. Fault trees were done. My 25 assessment was done in, the time and the Page 116 Page 117 1 W. VIGILANTE 1 W. VIGILANTE resources available. 2. 2 do you recognize this document? 3 Q. Are you familiar with the phrase 3 A. Looks to be a poor printout of my 4 "use error"? 4 home page and then looks like there's a 5 5 A. I'm more familiar with the term printout of my about page. 6 6 "user error." Q. Okay. Did you say "a poor 7 Q. Okay. Are you able to define the 7 printout"? 8 phrase "use error"? 8 A. Yeah, I mean this isn't what it 9 A. You're going to have to give me a 9 looks like on my website, so it's a poor 10 10 printout of the website. context. O. Okay. Are you able to read it? 11 O. In the medical device context are 11 12 you familiar with that phrase? 12 A. There's a bunch of text that's 13 13 A. I'm not sure how they're defining obscured by the graphic. 14 14 Q. That's on the front page, the it. 15 15 landing page of the website; correct? Q. Okay. Let's talk about what you did to -- well, actually, let me -- before I A. The home page? 16 16 17 get to that... 17 Q. Right. The home page, landing 18 (Exhibit Vigilante-5, multipage 18 page, right, where the language is obscured. 19 document entitled William Vigilante Human 19 A. Yeah, you're using a loose term. Factors ExpertVigilante Forensic, is marked 20 20 Landing page may not be the home page. It --21 for identification.) 21 so it depends on how you're using it, but this 22 22 MR. SCHULTZ: Is that Number 5? is my home page. COURT REPORTER: Yes. 23 23 Q. Right. And the term I used was I 24 Q. Mr. Vigilante, the court reporter 24 don't think loose. It was the home page's 25 has handed you Exhibit Number 5 which -- well, 25 landing page.

2	describing my background and the type of work	2	A. Yes.
3	I do that would fit in the field and area that	3	MR. SCHULTZ: All right. Why don't
4	was offered.	4	you mark that.
5	Q. What field and area was it offered	5	(Exhibit Vigilante-9, multipage
6	in?	6	document entitled William J. Vigilante,
7	A. It's a website. There's	7	Jr.:: Real Estate - Human Factors::
8	there's a form. They're typically limited	8	JurisPro Expert Witness Directory, is
9	for for text and characters. So if it was	9	marked for identification.)
10	limited for text and characters that's where I	10	Q. Do you recognize Vigilante-9?
11	had to fit it into; and like I said, if I had	11	A. Yes.
12	given them information and they needed to cut	12	Q. What is it?
13	it down, they may have edited it. I just	13	A. It's my listing in the JurisPro
14	don't know at this point.	14	Expert Witness Directory.
15	Q. Are there significant areas of	15	Q. That's also something that you
16	your qualifications as an expert in the fields	16	created, correct, or inputted if you will?
17	of human factors and ergonomics that are	17	A. Yes, I I there were forms
18	missing from that description?	18	that I input into.
19	A. Well, I have a whole CV that's	19	Q. Okay. And much of this document
20	that's, what, ten pages long and this is just	20	is in the form of questions and answers;
21	one form on a website. So, yeah, I mean, I	21	correct?
22	I couldn't fit everything in there.	22	A. Yes.
23	Q. Okay. So your your CV is the	23	Q. And the questions were questions
24	most complete statement of your experience;	24	provided by JurisPro Expert Witness Directory
25	correct?	25	and the answers are what you typed in;
	Page 128		Page 129
1	W. VIGILANTE	1	W. VIGILANTE
2	correct?	2	actually 36 at this point.
3	A. Yes.	3	Everything else seems to be
4	Yeah, so it looks like some of	4	reasonably accurate.
5	this information is outdated.	5	Q. Okay. Have you worked with
6	Q. What information is outdated?	6	Mr. Haverty on litigation matters before?
7	A. Without going through all of it,	7	A. I have not.
8	for example, it says, "When was the last time	8	Q. Have you worked with members of
9	you had your deposition taken," and I put	9	his firm, Williams Cuker & Berezofsky, before
10	October 2015. Obviously that's incorrect. I	10	this case?
11	think this is the information that I had at	11	A. It's possible, but I don't know.
12	the time I filled the form out in probably	12	The name of the firm is not familiar to me.
13	October of 2015. My rate has changed too. So	13	Q. Is everything that you reviewed in
7 /	I Irmary that's different And than have many	14	arriving at your opinions listed in your
14	I know that's different. And then how many		
15	years I've worked in the legal industry as	15	report or reports?
15 16	years I've worked in the legal industry as a as an expert, that should be 14 plus, not	15 16	report or reports?  A. Everything I plan on relying upon,
15 16 17	years I've worked in the legal industry as a as an expert, that should be 14 plus, not 13 plus because it's the next year.	15 16 17	report or reports?  A. Everything I plan on relying upon, yes.
15 16 17 18	years I've worked in the legal industry as a as an expert, that should be 14 plus, not 13 plus because it's the next year.  Q. So in other words	15 16 17 18	report or reports?  A. Everything I plan on relying upon, yes.  Q. Did you review materials that

2	upon or download and rely upon. So	2	"Applying Human Factors and Usability
3	certainly there's potential I looked at other	3	Engineering to Medical Devices, Guidance For
4	information, but the things I'm relying upon	4	Industry and Food and Drug Administration
5	are listed in my report or provided with me	5	Staff."
6	here today.	6	Q. Did you say 2006 or 2016?
7	Q. Okay. Were you provided	7	A. 2016.
8	information or documents that you did not rely	8	Q. Okay. All right. Now
9	upon?	9	A. I may have said 2006. If I did, I
10	A. Certainly in all of the documents	10	apologize.
11	I got, some were more relevant to what I was	11	Q. You you meant 2016 if you did.
12	doing than others. So I think that's the best	12	All right. Did you conduct any
13	way to put it.	13	interviews as part of your opinion
14	Q. Are any of the documents that you	14	formulation?
15	were provided not listed in your report?	15	A. The only thing that I would
16	A. Reports. If it's reports	16	fall into that category is my discussion
17	Q. Reports. Sorry.	17	with telephone discussion with
18	A. Yes, I did receive the deposition	18	Dr. Kilowicz
19	of Dr. Klimowicz, and that's not listed in any	19	Q. Okay.
20	of my reports.	20	A Klimowicz.
21	Q. Okay. Other than Mr. Klimowicz's	21	Q. When did
22	report, anything that's not listed in your	22	A. Sorry.
23	reports?	23	Q that occur?
24	A. The only thing that's not listed	24	A. April 13, 2016.
25	in the report was the 2006 FDA document	25	Q. And what was your purpose for
	Page 132		Page 133
1	W. VIGILANTE	1	W. VIGILANTE
2	speaking with Mr. Klimowicz?	2	A. Yes.
3	A. I think that was the beginning of	3	Q. Was anybody else on the call?
4	my report writing. So I wanted to go over	4	A. Mr. Haverty.
5	with Dr. Klimowicz his opinions, his findings,	5	Q. Okay. Were you relying upon
6	and make sure that I have a a correct	6	Mr. Klimowicz's facts or opinions in drafting
7	understanding of of the things I was	7	your report?
8	talking about.	8	A. As the subject matter expert I was
9	Q. Okay. We'll come back to that.	9	relying upon him in part, yes.
10	But in general, am I correct in	10	Q. Okay. Did you did
11	understanding that you were talking to	11	Mr. Klimowicz tell you anything of a factual
12	Dr. Klimowicz or Mr. Klimowicz so that you	12	nature that you did not include in your
13	could understand what he was opining was the	13	reports?
14	failure mechanism at issue in this case; is	14	A. I don't know.
15	that a fair summary?	15	Q. That's something that would be
16	A. Yeah, so I have notes from the	16	discernable from your notes perhaps?
17	teleconference and I can tell you the things	17	A. Yes.
18	we talked about, and certainly one of the	18	Q. Tell me what your just, in
19	things that I wanted to get from the dep or	19	general, tell me your process, the process you
20	from the teleconference was what mis or	20	went through to formulate your opinions in
21	Dr. Klimowicz's findings, opinions were	21	this case.
22 23	were going to be, you know, what what was	22	A. Yeah, so I rely upon the
23 24	his findings through his investigation.	23 24	scientific method when I do a investigation,
25	Q. Okay. And you you have notes of that telephone conference?	25	particularly for assessment of of warnings for a product. I start with a typically it

starts with a call from a client and I get general question areas that I'm asked to -- to look at.

I start doing some research, whether it's, you know, online research looking at the product, looking at maybe information that's out there related to the product, looking at things that are related to the product.

Then I start drafting hypotheses based upon my review of the initial -- my initial review of the information. I then continue with the -- the -- and it could be, depending upon the time frame, it could be condensed into a few weeks, it could be dragged out over a few months. But as the discovery information starts coming in, I start gathering the facts of what happened, how it happened, who was involved, when it happened, and so forth.

So I look at what was done from the manufacturer's standpoint, when it was done, how it was done, what they did with warnings, with -- what -- what was the end

# W. VIGILANTE

result, who was involved, what type of assessments we're doing. Same thing with the risk assessment and identifying foreseeable hazards associated with the product.

I then -- once I'm done with the discovery material, I look at what is the standard of care for product developers, warning -- warning designers and developers and look to see whether or not the -- in this case whether or not the manufacturer -manufacturers met the standard of care. And then I also look at whether or not their -their warnings, instructions, in this case the IFUs, met the standard of care for the presentation of instructional and warnings information.

And then I come to my conclusions based upon my assessment of whether or not they met the standard of care; and then I formalize and memorialize my opinions in my reports.

Q. Okay.

A. If it's a -- that's what I did for this case. Some -- some courts, they don't

Page 136

require reports, so it may be done in an affidavit or disclosure, some other method, but for this case it's memorialized in a report.

W. VIGILANTE

O. Right. You said at the beginning of this that you follow the scientific method. Would you define for me what you mean by "the scientific method"?

A. Sure. You know, the scientific method you start with questions. You develop hypotheses from your initial research. You collect data. You put together a way to collect that data, a way to test that data. You do the -- you do the -- the assessment, the testing of the data you collected; and then you analyze that data and you determine whether or not your hypotheses were supported or not. And then, of course, part of it is -is memorializing it.

Q. Did you, as part of your opinion formulation process in this case, did you ask for or review the design history file for the P-cap or what others refer to as the proprietary connecter?

Page 137

### W. VIGILANTE

- 2. A. I did not ask for it.
  - Q. Did you receive it?

A. I don't -- I don't know if it was in the discovery material that I have. That's the -- I don't know if it was received in the discovery material.

Q. Okay. Do you -- were there -were any fact provided to you by any person that you relied upon in formulating your opinion?

In other words -- and let -- let me just be clear. I'm asking you for factual information as distinct for -- from conversations that you may have had with, for example, Mr. Haverty about matters of a non-factual nature.

A. Yeah, so all the facts that I used to -- to support my analysis and opinions are laid out in the report; and they're identified specifically by the party and if it's a deposition, the page number on which the party testified to that particular fact.

Q. Okay. Let -- let me rephrase the question a little bit.

Page 138 Page 139 1 W. VIGILANTE 1 W. VIGILANTE 2 What I was trying to get at was 2 report. He couldn't very well give me it at 3 3 whether you were provided facts by any person start of my report writing, so I would have 4 where the facts were not either contained in 4 relied upon that conversation in part for some deposition testimony or in documents produced 5 5 of my work --6 in discovery. 6

So the case-specific facts I received through the discovery documents and my conversation with Dr. Klimowicz. I didn't have another source for case-specific facts.

Q. Yeah. I can ask it a different way. I -- I -- I think I know your answer, but I just need to be clear.

Did Mr. Haverty or Mr. Klimowicz or any other person verbally provide you factual information that you relied upon those statements in formulating your opinions?

A. Not from Mr. Haverty, but from Dr. Klimowicz. Again, we had a teleconference to go over his opinions and findings because he was -- you know, he's reporting -- he's writing his report while I'm writing my

Q. Okay.

A. -- understanding different aspects of what he was doing and so forth.

Q. Right. And -- and those -- that information revolved around the alleged failure mechanism of the temporary blocked vent; correct?

A. Oh, I've got a whole sheet of notes, so -- as to what the conversations were about. So part of the notes are certainly the defects that he identified with the -- with the product, with the P-cap and the -- the Paradigm Reservoir and the infusion set.

We talked about the -- the Lot 8 problems. We talked about the -- how the infusion device goes through the 501(k) [sic] device process. So certainly I'm not an expert in that process. I would leave testimony to that process to Dr. Klimowicz.

You know, we -- we talked about

Page 140

### W. VIGILANTE

how the different components of the system and what are -- where -- where they fall within the regulatory process.

You know, we went through the infusion set. I had some questions about what the -- I have the -- I had a -- a sample of the infusion set and the reservoir. I just wanted to make sure I was correct in my understanding of what was included in -- in each part of it.

We talked about how they were sold and what came with them. We talked about the -- the pump being an approved medical device and some of the submission process for that. You know, we talked about the fact that the infusion set and the reservoir were not considered a medical device like the pump, that there was no thorough assessment and approval of the product and instructions by the FDA.

We kind of went over the history a little bit of -- of -- of the Paradigm -- of the Paradigm pump and the initial -- one of the initial requirements that it be

Page 141

### W. VIGILANTE

waterproof, and how that requirement eventually got dropped, but they didn't change the design of the vent cap -- of the vents in the cap.

You know, Dr. Klimowicz described to me that it only happens during priming, it doesn't happen if -- if you do a bolus later on. He talked to me a little bit about the glucose monitor sensor and how it transmits data. He went over the manual prime procedure a little bit. He, you know, went over the fact that there was no evidence that the infusion tube was connected to the cannula before she primed the tube.

Yeah, we talked about the fact and re -- reiterated the fact that you can't have any -- any liquids or contaminants on the reservoir before attaching the P-cap and that it should be wiped down in -- with an alcohol swab; and that the -- we discussed that the warning should have included -- the warnings for -- the IFU should have included a warning to that effect.

Q. A warning to what effect?

Page 142 Page 143 W. VIGILANTE W. VIGILANTE 1 1 2 A. That it needs to be -- do not 2. A. No, I don't know that I would 3 allow liquids, et cetera, from contacting the 3 describe them as facts. I would describe them 4 top of the reservoir, to wipe it down, et 4 as discussion. Some of them are facts and 5 5 cetera, and that can cause problems if you some of it's discussion. Some of it's Dr. Klimowicz explaining things to me better, 6 don't, or if there is, and you don't. 6 7 And we talked about the -- the 7 reinforcing what I've already known or me 8 8 need to refill or change the reservoir and set talking with him about what my take on the every three days and that -- you know, we also 9 9 issue is. 10 talked about that it's foreseeable you can 10 Q. And you incorporated some of that 11 miss the step of turning the vial back over. 11 information into your report; right? 12 Even if you know it or are taught it, you may 12 A. Yes. 13 have forgotten, you may have misunderstand it, 13 O. Okay. You said a moment -- well, distracted, hurrying. So there's a -- a -- a 14 14 first of all, you have a reservoir and an list of different things that can occur that 15 infusion set you were provided; is that 15 just makes it a bad -- a bad design in -- in 16 16 correct? 17 making that requirement for the litany of 17 A. Yes. reasons why people inadvertently do things 18 Q. Where did you get that? 18 19 because they're, in fact, human and they're A. Mr. Haverty's office. 19 20 20 expressing human tendencies such as Q. Okay. Do you know where 21 inattention, distraction, forgetting, 21 Mr. Haverty obtained them or do you have an 22 hurrying, so forth. 22 understanding? 23 O. And those facts that you've just 23 A. Yeah, I'm not sure if he obtained relayed here or related here came from you --2.4 24 them upon initiation of his involvement in 25 came to you from Mr. Klimowicz; right? 25 this suit or if these were actually left over Page 144 Page 145 W. VIGILANTE 1 W. VIGILANTE 1 2 2 from what the plaintiff and her mother work, you're not familiar with them; correct? 3 recovered after the incident. 3 A. Yeah, that's not my area of 4 Q. Okay. You said earlier when you 4 expertise. 5 5 were describing or reading from your notes of Q. Okay. In fact, you said a moment 6 your conversation with Mr. Klimowicz that the 6 ago that one of them was the 501(k) process. 7 infusion set and reservoir were not a medical 7 You meant 510(k); right? 8 8 device the way the pump was. Do you recall A. If I said 501, I meant 510(k) 9 9 'cause I've got 510(k) written in my notes. saying that? 10 10 A. I don't know if I used those words Q. Okay. And the 510(k) process, is 11 exactly, but I recall that topic coming up 11 it your understanding that that does not 12 12 involve -- I think you used the phrase that Q. What --13 the FDA does not fully consider the device in 13 14 A. -- the conversation. 14 that process? 15 15 Q. What do you mean by that? A. It's my understanding that the IFU A. It's my understanding that the -for the pump is considered a label and it's 16 16 17 the pump has to go -- is a medical device 17 submitted with the application for approval, 18 that's approved by the FDA, that the IF -- IFU 18 but it's not the case that the FDA reviews and 19 is approved by the FDA and that it goes 19 signs off on the IFU for the reservoir and the through a different regulatory process than 20 20 infusion set. 21 the infusion set and the reservoir. So that 21 Q. Okay. And that's information or 22 22 an understanding provided to you by there's a -- there's a different process and 2.3 different regulations that apply to the -- the 23 Mr. Klimowicz? A. That would have been one of the 24 two sets of products. 24 25 Q. As to how those review processes 25 topics that Dr. Klimowicz went over with me.

You know it's available now; right? A. Yes, I do. Q. All right. And from having reviewed that information, you wouldn't argue with me that it's relevant to your opinions;	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	W. VIGILANTE  A. To parts of them, yes. Q. Right. And so in retrospect, you would have wished that it had been provided to you before you formulated your opinions in this case?  A. As I said a little bit ago, if I knew it was available, I would have liked to have had it.  Q. Right. You're not a design engineer; correct?  A. I am not an engineer. Q. All right. You're not offering opinions on the design of the P-cap; correct?  A. As it relates to the overall product design and where warnings fit in, I am. With respect to the specific design, I'm not.  Q. Well, let me put it a different way.  You're not offering opinions on the physical design of the P-cap itself as distinct from how the instructions or warnings should have been written in your opinion?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. VIGILANTE formulated your initial opinions in this case; correct?  A. If I knew it was available, I would have liked to have had it. Q. Well, whether or not you knew it was available, you would have liked to have had it; right?  A. I'm sorry. I don't mean to argue with you, but if I didn't know it was available, I wouldn't know whether I would like it or not. Q. In you wouldn't know if you would like it or not?  A. If I don't know it's available. I mean, we're getting into a Dick Cheney thing here where you can't know what you don't know. Q. Well, I understand that you didn't know it was available. You know it's available now; right?  A. Yes, I do. Q. All right. And from having reviewed that information, you wouldn't argue	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. VIGILANTE A. To parts of them, yes. Q. Right. And so in retrospect, you would have wished that it had been provided to you before you formulated your opinions in this case? A. As I said a little bit ago, if I knew it was available, I would have liked to have had it. Q. Right. You're not a design engineer; correct? A. I am not an engineer. Q. All right. You're not offering opinions on the design of the P-cap; correct? A. As it relates to the overall product design and where warnings fit in, I am. With respect to the specific design, I'm not. Q. Well, let me put it a different way. You're not offering opinions on the physical design of the P-cap itself as distinct from how the instructions or warnings

Page 154 Page 155 1 1 W. VIGILANTE W. VIGILANTE 2 2 Q. And you're not offering an opinion me. 3 3 Q. Okay. I'll rephrase it. on how the event that is the subject of this 4 You're not offering an opinion 4 lawsuit occurred, are you? 5 5 A. Oh, no. I'm leaving that to that it was somehow an inappropriate design 6 from an engineering perspective to include a 6 Dr. Klimowicz and others. I'm not rendering 7 7 venting mechanism in the P-cap; correct? an opinion as to the -- the ability for air to 8 8 A. Oh, veah, I'm not offering travel between the membrane that was used and 9 9 opinions with respect to specific design the types of materials that were used for that 10 10 membrane when it's contaminated with insulin features of it. 11 Q. Right. 11 or other contaminants. 12 12 A. I would iss -- I would deal with Q. So you're taking it as a given in 13 design issues as they fall into the overall 13 formulating your opinions that Rachel Dennert 14 suffered hypoglycemia as a result of something 14 safety hierarchy when dealing with product design. So the term "design" has a lot of 15 known as temporary blocked vent or prime/fill 15 connotations. I just want to make sure that 16 anomaly, you're just assuming that as a given; 16 17 we're on the same page with them. 17 correct? 18 O. No, I understand. Taking the MR. HAVERTY: Objection, if vou're 18 design of -- or the design features of the 19 making any assumptions at all. 19 P-cap itself, you were then looking at it from 20 A. Yeah, it's my understanding that 20 21 the perspective of whether the instructions 21 that's what happened. 22 Q. Well, what's -- your understanding 22 and the warnings were adequate; correct? 23 that that, in fact, happened or are you taking 23 A. Yeah, given the design of the product, I'm looking at whether the 2.4 as an assumption that that's what others 24 25 instructions and warnings were adequate. 25 believe happened? Page 156 Page 157 1 W. VIGILANTE 1 W. VIGILANTE A. That's what my understanding is 2. 2. administered an overdose of insulin or 3 others have concluded. 3 excessive amount of insulin and that related 4 Q. Okay. And you're not quarreling 4 to whatever medical problems that she with that and you're not taking a side with 5 5 suffered. 6 that. You're taking that as a -- as a 6 O. And you would concede that you are 7 starting point for your opinions about 7 not qualified to offer an opinion on whether, 8 in fact, she had blocked vent membrane in her 8 instructions and warnings; correct? 9 MR. HAVERTY: Objection. 9 P-cap? 10 10 A. No. What I'm taking as a starting MR. HAVERTY: And he won't offer any point is the fact that Medtronic identified 11 11 such opinion. the prime/fill anomaly; and, in fact, it was 12 A. Yeah, so two things. I don't know 12 that I'm qualified or not, but I haven't been foreseeable when they were designing and 13 13 developing it back in the late '90s, early asked to do that and I wasn't planning on 14 14 2000s before Ms. Dennert was ever prescribed 15 15 doing it. the -- the products. 16 Q. Do you think you're qualified to 16 17 Q. Well, are you or are you not 17 render that opinion? 18 assuming that Rachel Dennert's hypoglycemia on 18 A. I'd have to look at what the August 8 of 2009 resulted from a condition 19 analysis was to -- to get involved with it and 19 20 20 known as temporary blocked vents? determine whether or not I am, but I haven't 21 A. Yeah, my understanding is that at 21 been asked to it, so it hasn't been anything some point on the night prior to the being 2.2 that's been come up -- that has -- that has 22 found, that the vents were blocked consistent 23 23 come up. with the prime/fill anomaly that Medtronic had 24 24 Q. Would you agree that if, in fact, 25 identified, and that because of that she was 25 Rachel Dennert's hypoglycemia were not caused

(Exhibit Vigilante-11, letter dated June 16, 2016 addressed to Kevin Haverty, Esq., is marked for identification.) THE WITNESS: Thank you. Q. Mr. Vigilante, the court reporter has marked Exhibit Number 10 which is your April 19th initial report and Exhibit Number 11 which is your supplemental report;
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	W. VIGILANTE conversations with Mr. Klimowicz as to which infusion set is at issue of the two that were used on the night of August 8th, 2009?  A. It's understanding that Dr. Klimowicz has concluded that the contamination of the P-cap occurred in the second change-out refilling of the night at around ten o'clock, eleven o'clock, whatever the time is; and that's when the contamination and blockage of the vent vents occurred.  Q. All right. So just I just want to make sure that it's clear. Your understanding of how the event occurred comes from Mr. Klimowicz; correct?  A. And the testimony of Rachel's mother.  Q. Okay. As opposed to based upon some original investigation by yourself?  A. Yeah. I did not do an investigation by myself to determine at which point in time the contamination and the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	W. VIGILANTE produced two reports; correct? A. Yes. Q. An initial report dated, I believe, April 19th of 2016 and then a supplemental report; right? A. That's correct. Q. All right. (Exhibit Vigilante-10, Report of William J. Vigilante, Jr., PhD, CPE dated April 19, 2016, is marked for identification.) THE WITNESS: Thank you. (Exhibit Vigilante-11, letter dated June 16, 2016 addressed to Kevin Haverty, Esq., is marked for identification.) THE WITNESS: Thank you. Q. Mr. Vigilante, the court reporter has marked Exhibit Number 10 which is your April 19th initial report and Exhibit Number 11 which is your supplemental report; correct?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. 2	that was the one that you generated as a	2	Q. Who is she?
3	result of being provided with the deposition	3	A. She was a MiniMed and later a
4	and exhibits for the deposition of Susan	4	Medtronic employee, and I don't have the exact
5	McConnell; right?	5	job description, but I can look it up if you
6	(Reporter clarification.)	6	would prefer.
7	Q. Susan McConnell; right?	7	Q. Well, do you have an understanding
8	A. I'm sorry. I missed your	8	of generally what her job was at the time of
9	question.	9	the development of the P-cap?
10	Q. Sure. You generated the	10	A. I did at the time I wrote the
11	supplemental report two months after your	11	report. I'd have to look up my notes to see
12	original report because in the interim you'd	12	what her job description was.
13	been given the deposition of Susan McConnell;	13	Q. Well, regardless of her job
14	right?	14	description, would you agree that she was
15	A. Yeah. So after I wrote my first	15	involved in the risk analysis and human
16	report, I was provided with the deposition of	16	factors assessment related to the P-cap during
17	Susan McConnell Monta Montell Mont	17	its development?
18	how about we just do Susan McConnell and	18	A. It it seems that she was
19	the exhibits that went along with that	19	involved in the human factors testing that was
20	deposition.	20	done in the early 2000s.
21	Q. And prior to well, at the time	21	Q. You would agree that that
22	you wrote your initial report, Exhibit 10, you	22	information is relevant to the subject matter
23	weren't aware of Susan McConnell or her	23	on which you've been asked to opine in this
24	deposition; right?	24	case?
25	A. That's correct.	25	A. Sure.
23	71. That's correct.	23	71. Guic.

Yes, so my understanding when I wrote the initial report, all the other Medtronic, MiniMed employees and Unomedical employees testified that there was no human factors assessment done on the products that they were aware of. So at the time I wrote the report, I wasn't aware that any, any human factors was done or any risk analysis was done according to the guy who designed the P-cap system, Mr. Adair.

Page 170 Page 171 W. VIGILANTE 1 W. VIGILANTE 1 2 2 He was not involved in any risk was my understanding. I have since -- since 3 3 analysis for the infusion sets used in the 511 writing that report I learned that Susan 4 McConnell had been deposed and she testified 4 system, Page 92. 5 He was not responsible for 5 that there was a human factors study, two 6 studies done in the early 2000s; and those --6 identifying potential risk associated with his 7 7 design of the P-cap, Pages 122 to 123. He had reports from those studies were produced as 8 never had any discussions with anyone who was 8 exhibits -- or as an exhibit. 9 responsible for identifying potential risk 9 Q. And to be precise, I mean, you did 10 associated with his design of the P-cap, Page 10 read the deposition of Randy Adair, did you 11 11 122. not? 12 12 A. Yes. So there -- that's my summary of 13 Q. And to be precise, he testified 13 his deposition testimony. that he was not involved in any human factors 14 Q. So Mr. Adair testified that he was 14 15 not involved in any human factors analysis and 15 studies; correct? 16 A. Hold on a minute. I'll tell you 16 he didn't know whether one was done or not? 17 what his testimony is. 17 A. That's not correct. 18 18 (Reviewing document.) O. How is that incorrect? 19 He testified he did not do any 19 A. He does not know if any human human factors testing in the design of the 20 20 factors testing was done and he did not do any 21 P-cap on Page 71. He testified he does not 21 human factors testing -know if any human factors testing was done on O. Right. And --22 22 the P-cap on Page 71. He does not know if 23 A. -- on the design of the P-cap. 23 2.4 MiniMed did any safety testing on the P-cap on 24 Q. And based on that, you criticize 25 71. 25 Medtronic in your first report saying that Page 172 Page 173 1 W. VIGILANTE W. VIGILANTE 1 2. 2 they hadn't done any human factors testing, Q. And you criticized Medtronic 3 3 didn't you? saying that they didn't do any; correct? 4 A. I'm sorry. There was other 4 A. Sure. 5 testimony from other employees of Medtronic 5 O. And you were wrong, they did, 6 6 and Unomedical. didn't they? Q. Answer my question, please. 7 7 A. After writing my report, I had 8 You -- you criticized Medtronic 8 learned that there was two human factors tests 9 saying that they had not done any human 9 done on the IFU for the Paradigm pump --10 factors analysis in the development of the 10 excuse me, Paradigm Reservoir infusion set. O. So that was a false criticism on 11 P-cap: true? 11 12 A. One more time 'cause I was waiting 12 your part. for another part to your question. 13 13 A. I think it --14 Q. In your initial report you Q. It was an inaccurate one. 14 criticized Medtronic for failing to do any 15 15 A. Sure. Inaccurate is probably a human factors analysis during the development 16 16 good word. 17 of the P-cap --17 Q. Okay. And it was unfair, wasn't 18 A. Yes --18 it? Q. -- true? 19 19 MR. HAVERTY: Objection. Dave, save 20 A. -- during my initial report, it 20 that for the jury, Dave. 21 was my belief and understanding that they had 21 MR. SCHULTZ: No, no, it's --22 not done any human factors testing, but it was MR. HAVERTY: That's argument. 22 2.3 not based solely on Randy Adair's testimony. 23 MR. SCHULTZ: -- it's a question. It was based upon his testimony and other 24 MR. HAVERTY: That's argument. 24 25 employees' testimony. 25 Q. Do you think it was unfair?

	Page 174		Page 175
1	W. VIGILANTE	1	W. VIGILANTE
2	A. I	2	deposition?
3	MR. HAVERTY: That's a different	3	A. Yes.
4	question.	4	Q. Are you aware that Mr. Haverty was
5	A. Yeah, I don't think it's unfair	5	present during the deposition?
6	because I wasn't aware of it. If I was aware	6	A. I you know what? I don't
7	of it and I didn't use it, then it would be	7	recall, but I can look.
8	unfair. My report is based, as stated in my	8	First of all, it's my
9	report, based upon the information I had	9	understanding that that deposition was taken
10	available at the time. Should additional	10	in the John Kubiak and Karen Kubiak matter on
11	information become available, I'm happy to	11	behalf of Carolyn Kubiak.
12	redo my analysis, relook at it, and determine	12	Q. Are you unaware that it was
13	whether or not my opinions still apply or not.	13	cross-noticed in this case, the Dennert case?
14	Q. And and to be precise about it,	14	A. I wasn't done. So that's first
15	the information was always available, it just	15	thing I wanted to point out.
16	wasn't given to you?	16	And the second was whether or not
17	A. I don't know that either, so I	17	Mr. Haverty was there, and apparently he was
18	I don't	18	there
19	Q. You know the date of	19	Q. Are you aware
20	Ms. McConnell's deposition, don't you?	20	A but the
21	A. I know that I didn't have it.	21	Q that it was cross-noticed in
22	Whether or not it was available to Mr. Haverty	22	the Dennert case?
23	or someone else prior to that, I I don't	23	A. Yeah, I don't know what
24	know. I wasn't privy to that information.	24	"cross-noticed" means.
25	Q. Have you read Ms. McConnell's	25	Q. Are you aware that it was taken in
	Page 176		Page 177
1	W. VIGILANTE	1	W. VIGILANTE
2	the year 2015?	2	said, yeah, but it was still inadequate;
3	A. It was taken on June 23rd, 2015.	3	right?
4	Q. So well in advance of your first	4	A. Well, so you've misstated a few
5	report?	5	things. One is that that wasn't my first
6	A. Yeah, it was done what's	6	opinion, but it is my second opinion; and two,
7	that ten months before my first report.	7	after looking at the human factors usability
8	Q. Okay. And having when you	8	testing report, the testing it did was still
9	finally received it after your first report	9	inadequate. So, yes, after looking at what
10	criticizing Medtronic for not having engaged	10	they did, what they did was inadequate.
11	in any human factors analysis, you then	11	Having not done it was inadequate, but what
12	concluded that despite having conducted human	12	they did was inadequate as well, so my
13	factors analysis, didn't change your opinion,	13	opinions still hold.
14	Medtronic was still deficient; is that	14	Q. That what was done was inadequate
15	correct?	15	even though you didn't understand that, in
16	A. Yeah, my opinions haven't changed	16	fact, you were initially wrong about whether
17	based upon that information. The IFU for the	17	one had been done or not?
18	reservoir and the infusion set are still	18	A. Yeah, so whether or not I knew it
19	deficient.	19	had been done or not doesn't change the fact
20	Q. Well, no, what I'm talking about	20	that it was an inadequate usability study
21	is your first opinion which is Medtronic	21	done; and, you know, there's I'm happy to
22	failed to conduct an adequate human factors	22	give you the reasons why it's inadequate.
23	evaluation; and initially your opinion was	23	It's not like I just made it up. If it had
24	they didn't do it at all and then when you	24	been a a thorough usability study, my
25	were proven wrong, that they did do it, you	25	belief is that they would have caught this
		1	

Page 178 Page 179 1 W. VIGILANTE 1 W. VIGILANTE 2 problem and they would have addressed it back 2 that they broke those tasks down to identify 3 the sub-step -- sub-steps that were required 3 in the early 2000s, not waiting until 2012, 4 2013. 4 for each -- to complete each tasks. There's 5 5 no indication of what information on behalf --Q. Well, let's -- I -- I want to come 6 back to that, but let me ask you this: Have 6 that's needed by the user to complete each of you reviewed Exhibits 8, 9 and 10 of Susan 7 7 the sub -- sub -- sub-steps. 8 8 McConnell's deposition? There's no indication that they 9 identify what actions were needed to complete 9 A. Hold on a minute. each of the sub-steps. There's no indication 10 10 (Reviewing computer.) 11 Yes. 11 of whether each sub-step action is consistent 12 12 Q. All right. All right. So why with conventional norms, behavioral tendencies don't we turn to -- why don't you tell me what 13 13 or user expectancies. There's no assessment 14 in your opinion was deficient about the human 14 of ease of use, comfort, stress, or efficiency factors evaluation that was performed by 15 for each task and sub-task. There's no 15 Medtronic during the development of the P-cap. 16 assessment of the errors or mistakes that can 16 17 A. So in the report that was 17 be made for each sub -- each sub-step. disclosed as McConnell-8, they discuss a task 18 18 There's no assessment of the consequence of 19 analysis that was done on the reservoir to 19 said errors, for example, hazards such as the 20 infusion set connection, IFUs, and the 20 P-cap being blocked and over- or 21 process; and they identify two usability 21 under-administration of insulin. 22 22 studies that were performed. For the solution for Task Number 7 23 So with regard to the task 23 through the task analysis, which Task 7 was 2.4 analysis, they identified ten tasks, but 2.4 remove transfer guard from reservoir, it 25 they -- there's no indication in the report 25 states. "The instructions describe how the Page 181 Page 180 1 W. VIGILANTE W. VIGILANTE 1 transfer guard must be removed." However, 2. 2 Ms. Dennert had never used a pump 3 3 that solution identified in the task analysis before, and I'm sure there are many pump users 4 was never implemented in the IFU for the 4 and infusion set users that had never used reservoir that was provided to Ms. Dennert. 5 5 this type of product before, but yet they 6 So those are the problems I identified with 6 weren't represented in their usability 7 7 their task analysis. studies. 8 8 For their usability studies the Q. Can you point to me -- can you --9 big thing is is that they didn't use a 9 A. I'm not done. representative population of users. They went 10 10 Q. Well, but you're --A. Well, I'm not done. 11 in -- into Mini -- into MiniMed and selected 11 12 employees. If you want to do usability 12 O. Well, but -testing to validate whether it can be used by A. You asked me a question. 13 13 14 your potential users, you don't go and pull 14 MR. HAVERTY: Let him answer the 15 the people that have experience with -- with 15 question. these types of products. And I think there's 16 Q. No, you're -- you're being 16 a list of in -- in here of their demographics 17 17 narrative. 18 that first -- the first usability study all 18 MR. HAVERTY: No, he's tell --Q. Okay. So I'm going to break it 19 ten -- all ten subjects were employees of 19 MiniMed in their Clinical Services Department, 20 20 down. 21 all possessed a thorough understanding of 21 MR. HAVERTY: You asked a question. 22 insulin infusion pump use, all had high 22 You asked a question. 23 experience with filling syringes, insulin 23 MR. SCHULTZ: Well, and I'm --MR. HAVERTY: He's telling you -pumps, and infusion sets, 60 percent were 24 24 MR. SCHULTZ: -- entitled to follow 25 college degrees, 40 percent had some college. 25

Well, in the first report I wasn't aware that any human factors or usability study was done, so I wouldn't have been able to assess it, evaluate it, and point out the deficiencies in it.  The second, I don't believe that I went into great detail of it other than the point I was trying to make, that the second major issue I had with it was that it didn't assess the IFU that was shipped with Mrs. Dennert's infusion set and reservoir. In fact, when they did their usability study, they made change they had an IFU they

	Page 186		Page 187
1	W. VIGILANTE	1	W. VIGILANTE
2	upon some of the usability study; and then	2	A in the
3	when they got done, they made additional	3	Q. I don't think you did either.
4	changes and didn't tell us what those changes	4	A supplemental report.
5	were and they never went back to validate	5	Q. Okay. Would you turn to your
6	whether or not the changes they made, whether	6	initial report, please?
7	they were effective or not.	7	A. Sure.
8	So if you're going to change	8	Q. In your segment on hazard
9	something because you're having problems, you	9	evaluation you discuss that or your opinion
10	just don't throw it out there and hope for the	10	is that Medtronic did not identify the hazard;
11	best. You got to validate what what you've	11	correct?
12	done works. So that was the the second	12	A. Well, I think that you're
13	major issue that I had with the usability	13	misstating a few things, so maybe we can
14	studies.	14	clarify that and then we can figure out what
15	Q. Are you done?	15	my opinion was.
16 17	A. Yes, sir.	16	So I have a section in my report
18	Q. Good. Now, can you point me to	17	entitled "Hazard Identification," and the
19	anywhere in your supplemental report that you wrote after learning that Medtronic had, in	18 19	opinion with that for that section is that
20	fact, done a human factors evaluation where	20	the unintended delivery of insulin resulting
21	you assert that the usability study didn't use	21	from the blockage of the P-cap connecter vents created a hazard to users of the Paradigm
22	a proper study population?	22	infusion set and reservoir.
23	A. I don't believe I discussed	23	Q. What I'm trying to understand is
24	that	24	what is the hazard that you are saying
25	Q. Okay.	25	Medtronic failed to identify?
	Q. Okuy.		reducing range to identify.
	Page 188		Page 189
1	W. VIGILANTE	1	W. VIGILANTE
2	A. Well, the hazard is the under- or	2	is, is that it was identifiable prior to 2012
3	over-delivery of insulin unintended	3	and prior to 2009 and it was identifiable
4	Q. As as a result	4	during should have been identifiable during
5	A and unknown.	5	the design process back in the early 2000s and
6	O = cf9		
	Q of?	6	late 1990s.

Are you saying	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Mr. Vigilante, I would appreciate an answer to my question. So listen carefully to my question.  A. Sorry.  Q. Your criticism is that in 2 among others, and we'll talk about all the others, in the year 2000, during the development of the P-cap, Medtronic failed to identify the hazard which is the unintended over- or under-delivery of insulin resulting from a temporary blocked vent condition; correct?  Have I stated that correctly?  A. I think my opinions are listed in
7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. As a result well, it's a result of the blocked vented excuse me Q. Okay.  A blocked vents. Q. So you would agree well, your your position is Medtronic failed to identify that hazard; right?  A. Well, that's part of it. My other part of it is that it was foreseeable. Q. I know that's not your entire opinion.  My question is: Are you saying that Medtronic failed to identify that hazard as you've defined the hazard? Are you saying that?	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. Mr. Vigilante, I would appreciate an answer to my question. So listen carefully to my question.  A. Sorry.  Q. Your criticism is that in 2 among others, and we'll talk about all the others, in the year 2000, during the development of the P-cap, Medtronic failed to identify the hazard which is the unintended over- or under-delivery of insulin resulting from a temporary blocked vent condition; correct?  Have I stated that correctly?  A. I think my opinions are listed in my report. So you're trying to paraphrase and combine them and condense them and change them
7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	A. As a result well, it's a result of the blocked vented excuse me Q. Okay.  A blocked vents. Q. So you would agree well, your your position is Medtronic failed to identify that hazard; right?  A. Well, that's part of it. My other part of it is that it was foreseeable. Q. I know that's not your entire opinion.  My question is: Are you saying that Medtronic failed to identify that hazard as you've defined the hazard? Are you saying that?  A. Well, two things. One is that Medtronic defined the hazard. I'm agreeing with them and using that as my understanding	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Q. Mr. Vigilante, I would appreciate an answer to my question. So listen carefully to my question.  A. Sorry.  Q. Your criticism is that in 2 among others, and we'll talk about all the others, in the year 2000, during the development of the P-cap, Medtronic failed to identify the hazard which is the unintended over- or under-delivery of insulin resulting from a temporary blocked vent condition; correct?  Have I stated that correctly?  A. I think my opinions are listed in my report. So you're trying to paraphrase and combine them and condense them and change them  Q. Is it inaccurate?
7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. As a result well, it's a result of the blocked vented excuse me Q. Okay.  A blocked vents. Q. So you would agree well, your your position is Medtronic failed to identify that hazard; right?  A. Well, that's part of it. My other part of it is that it was foreseeable. Q. I know that's not your entire opinion.  My question is: Are you saying that Medtronic failed to identify that hazard as you've defined the hazard? Are you saying that?  A. Well, two things. One is that Medtronic defined the hazard. I'm agreeing	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. Mr. Vigilante, I would appreciate an answer to my question. Your criticism is that in 2 among others, and we'll talk about all the others, in the year 2000, during the development of the P-cap, Medtronic failed to identify the hazard which is the unintended over- or under-delivery of insulin resulting from a temporary blocked vent condition; correct?  Have I stated that correctly?  A. I think my opinions are listed in my report. So you're trying to paraphrase and combine them and condense them and change them

Page 190 Page 191 1 1 W. VIGILANTE W. VIGILANTE 2 again and be specific and let's see if I can 2 again, the -- the opinions are in my report. 3 3 The opinions are, is that their failure to do get an answer to my question. 4 an adequate risk and haz -- human factors 4 Among everything else you say in 5 5 analysis -- I'm sorry. The failure -- their your report, you are asserting that Medtronic 6 failure to do an adequate risk and human 6 during the development of the P-cap failed to 7 7 identify the hazard; correct? factors analysis resulted in them failing to 8 8 A. They did. identify the hazard at the time of 9 9 development --Q. Okay. You would agree with me, 10 would you not, that a manufacturer cannot warn 10 Q. Okay. A. -- and that had they --11 of a hazard that they don't know about? 11 12 O. So --12 A. Sure. A. -- done that, you know, they --13 Q. Okay. And your point is that they 13 they should have identified it and they should 14 should have identified that hazard, broadly 14 15 speaking, during the development; correct? 15 have dealt with it: and that their failure to do the -- a proper, adequate human factors 16 Generally speaking, that's a 16 17 analysis was unreasonably dangerous and 17 correct statement; right? 18 A. Yes, had they done an adequate 18 created an unreasonably dangerous condition that caused or contributed to Mrs. Dennert's 19 human factors and risk analysis, they should 19 20 20 injuries. have identified it. 21 2.1 Q. Okay. But you would also agree Q. Mr. Vigilante, I'm not trying to 22 trick you here. Okay? And this deposition is 22 that if, in fact, someone concludes that an 23 adequate human factors evaluation was done, 23 going to take an awfully long time if every 24 and that adequate human factors evaluation did 24 time I ask you one question, you regurgitate 25 your entire opinion. Okay? So let me try it 25 not identify the hazard, then the failure to Page 192 Page 193 1 W. VIGILANTE 1 W. VIGILANTE 2 warn of that hazard is understandable; right? 2 A. You can look at the -- the ANSI 3 You'd agree with that? 3 standards that talk about symbol and pic --4 4 pictograph development where they require A. I would not because there's no 5 5 reasonable person that can look at the comprehension and critical confusion testing, 6 6 which wasn't done. That testing is done by a usability testing that was done and consider 7 it adequate. 7 representative sample of the user population, 8 8 Q. There is no reasonable person who which wasn't done. Testing also requires that 9 can look at the usability studies and the 9 you do it on the subject product with the 10 10 human factors analysis that were done and subject warnings, instructions, or whatever conclude that they were adequate? 11 you're providing, and that wasn't done. 11 12 A. That's correct. 12 This isn't a -- this isn't 13 13 Q. So if a -- if an expert testifying launching a rocket to the moon. This is 14 for Medtronic and employees testifying for 14 pretty simple stuff here. If you're going to 15 15 Medtronic say that the human factors analysis do a usability study quote-unquote, it should 16 and the usability testing that was done is 16 be with the people that are likely to use the adequate, they're unreasonable and wrong? 17 17 product, not your employees who've got a lot A. That would be correct. 18 of experience in the field. And if you're 18 19 Q. Okay. What standard that existed 19 going to assert that the IFU that you created 20 20 at the time of the development of the P-cap is adequate, you need to make sure that IFU is 21 are you utilizing for this opinion? 21 the one that -- is the one that you tested and A. The standard of care for product 22 22 not some other earlier revision that you 23 design and development. 23 changed and have no idea what the effects of 24 Q. Well, what -- I mean, is there a 24 those change are. 25 published standard you're referring to? 25 Q. Would you look at Page 8 of your

	D 104		D 105
	Page 194		Page 195
1	W. VIGILANTE	1	W. VIGILANTE
2	initial report?	2	Ms. Dennert was using, but it's not true for
3	A. Sure.	3	the IFU they tested back in the early 2000s.
4	Q. In the first full paragraph on	4	In the early 2000s they tested it with the IFU
5	that page you write, "Once the user attaches	5	telling you to keep the insulin bottle on the
6	the insulin to the opposite side of the	6	table. So, again, they changed the IFU. They
7	transfer guard"	7	changed the instructions at some point in time
8	A. I'm sorry. I got to find it.	8	after that testing was done and they never
9	Your top paragraph you said?	9	validated what effect that would have on
10		10	compliance and understanding and action.
11	Q. Middle of the top paragraph.	11	
12	A. Okay. And it starts where?	12	Q. This is for the purposes of
13	Q. It says, "Once the user attaches	13	pressurizing the vial, correct, this step?
	the insulin"		A. It's both for pressurizing the
14	A. Okay.	14	vial and for filling the reservoir or
15	Q "to the opposite side of the	15	extracting the insulin from the vial into the
16	transfer guard, they have to hold the	16	reservoir or, you know, fill the reservoir.
17	reservoir upright and the insulin vial upside	17	Q. Okay. Why do you say that that's
18	down."	18	different from the IFU that was tested?
19	A. Yes.	19	A. Because that's what the that's
20	Q. Is is that a true statement?	20	what is noted in the IFU usability excuse
21	A. Yes and no.	21	me. That's what's noted in the usability
22	Q. Okay. How is it true? How is it	22	report that was disclosed as Exhibit 8 in
23	not?	23	Susan McConnell's deposition.
24	A. It's true in the IFU that's in	24	Q. Okay. Next in this same
25	this pack that was relevant to the one	25	paragraph, you say, (as read): "However, if

Q. Do you have an understanding of how the user is supposed to use the reservoir to pressurize the vial?  A. Yeah, it's my understanding is that they connect the insulin vial to the other half of the transfer guard and they push the plunger in of the reservoir to inject air into the insulin vial and then to pull the plunger out to extract the insulin into the reservoir.  Q. But are do you have an understanding of how they're supposed to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the reservoir is removed while the insulin vial is inverted, the insulin can squirt out due to the increased pressure in the vial and contaminate the top of the reservoir."  Are you forgetting anything in that step?  A. I was looking at something before you started reading, so I lost the place. If you wouldn't mind redoing that  Q. Last sentence of the first paragraph of your report on Page 8.  A. Okay.  I'm sorry. Is there a question or did you want me to read it?  Q. Have you read it?  A. That's what I was asking. I didn't know if you were going to read it.  (Reviewing document.)  Okay. I read it.  Q. Is that true in all cases?  A. It's not true in all cases. It	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. All right. If the insulin vial is over-pressurized in other words?  A. If there's enough pressure to cause the insulin that's remaining in the insulin vial to be pushed out, so over-pressurized, yeah, I think that's, again, a fuzzy word that I'm not comfortable using because it hasn't been defined.  Q. Do you have an understanding of how the user is supposed to use the reservoir to pressurize the vial?  A. Yeah, it's my understanding is that they connect the insulin vial to the other half of the transfer guard and they push the plunger in of the reservoir to inject air into the insulin vial and then to pull the plunger out to extract the insulin into the reservoir.  Q. But are do you have an understanding of how they're supposed to determine how much to pressurize the vial?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	the reservoir is removed while the insulin vial is inverted, the insulin can squirt out due to the increased pressure in the vial and contaminate the top of the reservoir." 	Page 202		Page 203
1	W. VIGILANTE	1	
2	Q for some reason?	1 2	W. VIGILANTE
3	A. 'Cause it's been about an hour.	3	any manufacturer of any product, even with what you would consider to be an adequate
4	I'll ask you if you got another question	4	human factors evaluation, will not identify
5	you want to ask, I'm happy to	5	all the ways in which somebody might misuse a
6	Q. I have many questions to you ask,	6	product and/or cause themselves harm?
7	Mr. Vigilante.	7	A. Sure.
8	A. Then let's take	8	Q. All right. And that, in fact, is
9	Q. If you need a break	9	the very theory behind the fact that the FDA
10	A. Let's	10	requires post-market surveillance; right?
11	Q we can take a break.	11	A. Yeah, I'm not going to comment on
12	A. Yeah, that will work. Thank you.	12	what the F FDA's theory is. I don't know.
13	THE VIDEOGRAPHER: We are now going	13	Q. Okay. Well, do you understand
14	off the video record. The time is 14:29.	14	that post-market surveillance is intended to
15	(A recess is held from 2:29 p.m. to	15	disclose and then deal with hazards that were
16	2:38 p.m.)	16	not identified at the time of development?
17	THE VIDEOGRAPHER: Back on, 14:39.	17	A. Yeah, so the way you're describing
18	BY MR. SCHULTZ:	18	it, it's no different than any other product
19	Q. All right. Mr. Vigilante, in a	19	where after you put it into the field you want
20	moment I want to get into the details of the	20	to continue to monitor its use and problems
21	criticisms that you narrated earlier about the	21	that come up with its use so that you can
22	task analysis and the IFU. Okay? And I want	22	identify problems that you missed in your risk
23	to get into that in a second, but before we do	23	analysis and human factors analysis.
24	that, let me ask you: Would you agree that a	24	Q. Well, and not just that you
25	medical device manufacturer or for that matter	25	missed, but that there's no reason why you
	D 204		D 205
	Page 204		Page 205
1	W. VIGILANTE	1	W. VIGILANTE
2	would have caught; right?	2	or what objective basis can you point to for
3	A. It can be, sure. Anything is	3 4	determining that it was foreseeable?
	possible.		
4			A. Well, first you start with your
5	Q. I mean, 'cause 'cause not all	5	risk analysis, and Randy Adair testified that
5 6	Q. I mean, 'cause 'cause not all hazards and not all user errors are	5 6	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time
5 6 7	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?	5 6 7	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What
5 6 7 8	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct.	5 6 7 8	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the
5 6 7 8 9	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct.  Q. Okay. You said earlier that this	5 6 7 8 9	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion
5 6 7 8 9	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct.  Q. Okay. You said earlier that this hazard and I I just want to short	5 6 7 8 9 10	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set
5 6 7 8 9 10 11	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.	5 6 7 8 9 10 11	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well
5 6 7 8 9 10 11 12	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm	5 6 7 8 9 10 11	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake
5 6 7 8 9 10 11	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.	5 6 7 8 9 10 11	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that
5 6 7 8 9 10 11 12	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.  You said earlier that that was	5 6 7 8 9 10 11 12	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance
5 6 7 8 9 10 11 12 13	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.	5 6 7 8 9 10 11 12 13	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance of finding it.
5 6 7 8 9 10 11 12 13 14 15	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct.  Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.  You said earlier that that was foreseeable to Medtronic in 2000; correct?  A. Yes.	5 6 7 8 9 10 11 12 13 14	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance
5 6 7 8 9 10 11 12 13 14 15	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct.  Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.  You said earlier that that was foreseeable to Medtronic in 2000; correct?	5 6 7 8 9 10 11 12 13 14 15	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance of finding it.  Second, had they done a human
5 6 7 8 9 10 11 12 13 14 15 16 17	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.  You said earlier that that was foreseeable to Medtronic in 2000; correct?  A. Yes. Q. What what standard are you	5 6 7 8 9 10 11 12 13 14 15 16 17	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance of finding it.  Second, had they done a human factors assessment of the IFU that was
5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.  You said earlier that that was foreseeable to Medtronic in 2000; correct?  A. Yes. Q. What what standard are you using to determine foreseeability?	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance of finding it.  Second, had they done a human factors assessment of the IFU that was provided to Ms. Dennert, they would have
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.  You said earlier that that was foreseeable to Medtronic in 2000; correct?  A. Yes. Q. What what standard are you using to determine foreseeability?  A. I base foreseeability on what can	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance of finding it.  Second, had they done a human factors assessment of the IFU that was provided to Ms. Dennert, they would have realized that people are pulling the reservoir out while the insulin vial is inverted and they would have found the same thing that they
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.  You said earlier that that was foreseeable to Medtronic in 2000; correct?  A. Yes. Q. What what standard are you using to determine foreseeability?  A. I base foreseeability on what can be discerned through an adequate risk	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance of finding it.  Second, had they done a human factors assessment of the IFU that was provided to Ms. Dennert, they would have realized that people are pulling the reservoir out while the insulin vial is inverted and they would have found the same thing that they found let me think of the name, the
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here. When I say "this hazard," I'm referring to the prime/fill anomaly hazard. You said earlier that that was foreseeable to Medtronic in 2000; correct? A. Yes. Q. What what standard are you using to determine foreseeability? A. I base foreseeability on what can be discerned through an adequate risk assessment and haz or human factors assessment. Q. But how how can you decide what	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance of finding it.  Second, had they done a human factors assessment of the IFU that was provided to Ms. Dennert, they would have realized that people are pulling the reservoir out while the insulin vial is inverted and they would have found the same thing that they found let me think of the name, the gentleman's name. I'm sorry. I referenced
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here.  When I say "this hazard," I'm referring to the prime/fill anomaly hazard.  You said earlier that that was foreseeable to Medtronic in 2000; correct?  A. Yes. Q. What what standard are you using to determine foreseeability?  A. I base foreseeability on what can be discerned through an adequate risk assessment and haz or human factors assessment.  Q. But how how can you decide what would have been foreseeable through a human	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	risk analysis, and Randy Adair testified that he had all the knowledge he needed at the time he designed and developed that P-cap. What they didn't do is integrate that into the overall design development of the infusion set  Q. Well A and that was their mistake there. If they had Randy Adair part of that process, they would have had a better chance of finding it.  Second, had they done a human factors assessment of the IFU that was provided to Ms. Dennert, they would have realized that people are pulling the reservoir out while the insulin vial is inverted and they would have found the same thing that they found let me think of the name, the gentleman's name. I'm sorry. I referenced him in my report and I can't think of his name
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. I mean, 'cause 'cause not all hazards and not all user errors are foreseeable, are they?  A. Correct. Q. Okay. You said earlier that this hazard and I I just want to short circuit so that we can be efficient here. When I say "this hazard," I'm referring to the prime/fill anomaly hazard. You said earlier that that was foreseeable to Medtronic in 2000; correct? A. Yes. Q. What what standard are you using to determine foreseeability? A. Is and no reasonable person can disagree with your statement that it was foreseeable in 2000?  A. Assuming they did an adequate risk assessment and adequate risk human factors analysis, they should have foreseen it in 2000.  Q. Can a reasonable person disagree with you that even with whatever you consider to be an adequate human factors evaluation the hazard might not be identified?  A. Yeah, I wouldn't consider that reasonable.  Q. Okay. You, first of all, you have the benefit of hindsight; right?  A. If you mean the fact that I'm
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	pressure in the reservoir occur occurs due to the priming process when he designed P-cap vents.  Page 109, 110, (as read): "If pressure in housing exceed atmospheric pressure, resulting forces can cause reservoir piston to be driven inward, thus delivering unwanted insulin."  111, (as read): "If user introduces pressure internally to housing through priming, that could cause piston, a plunger to deliver unwanted insulin if vent membrane is blocked."  So that's apparently what he knew at the time.  Q. Okay. And you equate that with knowledge of the hazard that went unrecognized; right?  A. Well, no, he didn't recognize the hazard. That's why it was unrecognized.  Q. Right. But you're saying that that was all the information necessary to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. VIGILANTE factors analysis, they would have seen that people were likely to take the reservoir off with the insulin vial over it, resulting in the liquid getting on the interior of the P-cap. That, together with Randy Adair's knowledge, should have triggered to them that there is potential for a problem. Q. Is and no reasonable person can disagree with your statement that it was foreseeable in 2000? A. Assuming they did an adequate risk assessment and adequate risk human factors analysis, they should have foreseen it in 2000. Q. Can a reasonable person disagree with you that even with whatever you consider to be an adequate human factors evaluation the hazard might not be identified? A. Yeah, I wouldn't consider that reasonable. Q. Okay. You, first of all, you have the benefit of hindsight; right?

Page 210 Page 211 1 W. VIGILANTE 1 W. VIGILANTE 2 2 identified it in 2012 and after they had a Q. Okay. Is there a concept of the 3 3 number of prime/fill anomalies recognized in frequency of a hazard occurring that is 4 their call data and the unfortunate incident 4 relevant to your determination of 5 5 with Ms. Dennert, yes. foreseeability? 6 Q. Okay. So you now know that, in 6 A. One more time 'cause I'm -- got -fact, this precise failure mechanism could 7 7 O. Sure. 8 8 A. -- lost in that question. occur; right? 9 9 A. I do know that, yes. Q. Does it matter -- does 10 Q. All right. What, if anything, 10 "foreseeability," as you use that phrase, take have you done to avoid hindsight bias in your into account the likelihood that something 11 11 12 analysis? 12 will happen, the frequency of it? 13 A. So, yes and no. 13 A. I looked at what a reasonable risk Q. In what way "yes" and in what way 14 assessment hazard analysis would have 14 "no"? 15 15 discerned. 16 Q. Okay. Is there a standard we can 16 A. Well, it has to have some 17 point to that says objectively: "If you do 17 frequency. If it didn't have any frequency, all these steps, you will identify this"? 18 it would be, you know, not likely or not 18 19 A. There are standards, publications 19 happening and then it wouldn't be foreseeable. 20 20 on how you do an adequate risk assessment and But I think what you're confusing is, is that 21 usability analysis; and if you follow those 21 frequency is used as part of the assessment of steps, it's there to be seen. risk, and risk is a function of -- of hazard 22 22 O. It's inevitable that they would 23 23 severity, probability of occurrence or have discovered this hazard? 2.4 frequency and exposure rate. So frequency 2.4 25 A. Yes. 25 does play a part in your risk assessment, but Page 212 Page 213 W. VIGILANTE 1 W. VIGILANTE 1 2 not in the risk analysis. 2 catch on the first round, but you get it on 3 Q. Well, what I was trying to get at 3 the second round when you have the resources 4 is: If something happens -- does it matter in 4 and time, or time and money, the resources your mind in terms of deciding whether 5 5 including time and money. 6 something is foreseeable or reasonably 6 So frequency is a issue for assessing the level of risk, but not in 7 foreseeable how -- hold on. The question is 7 8 identifying risk because you -- you're 8 not done. 9 A. Sure. Go ahead. 9 designing a new product. It's a -- it's a 10 10 Q. -- how frequently it happens? new -- new cap. It's a brand new cap, brand 11 Does that matter? 11 new vents. There's none in the -- in the --12 A. So from a design -- product design 12 there's none in the market to judge what the standpoint, you shouldn't have any of it 13 13 frequency is. happening because the product isn't released 14 Q. Well, so then let's get at it at a 14 yet. So you need to foresee what could 15 15 different way. potentially happen, and part of your risk 16 16 When you're doing this hazard analysis is identifying the potential hazards; 17 17 evaluation or risk analysis, essentially, 18 and then through your risk assessment you can 18 correct me if I'm wrong, I'm sure you will, that you're relying on people, the engineers, 19 rank those hazards on severity, exposure, and 19 probab -- probability or likelihood and 20 the human factors people, everybody involved 20 21 determine how you're going to deal with it. 21 in the process to think of every way somebody 22 So when you do your risk 22 might misuse a product or use it incorrectly assessment, things that are high risk, high 2.3 and every sequence of events that might follow 2.3 hazard, you put more emphasis on. Things that 24 24 from that that might lead to a hazard? 25 25 are low risk, low hazard, maybe you don't A. Yeah, so what you're describing is

Page 214 Page 215 W. VIGILANTE 1 1 W. VIGILANTE 2 2 MiniMed designed and developed it to replace both the failure modes effect analysis where 3 3 an existing technology. You know, how did you start with what is the -- if -- if 4 something fails, the thing gets blocked, what 4 they -- how did they change it? The major 5 5 are the consequences of that. That's exactly change was its waterproof characteristics; and 6 6 to get it waterproof, they had to put those what it is. 7 7 The fault tree analysis, you go vents in. 8 8 back and deal with if -- what if something So the engineer should have been 9 9 happened and -- and what are the -- the sitting there, the Design Team should have 10 consequences of that. So you're talking about 10 been sitting there, well, what are the consequences of having these vents, what if 11 what a risk analysis is. That -- that's --11 12 that's what the engineers and the -- the human 12 the vents get blocked, What are the 13 factors people and the other people in the 13 consequences of the vents getting blocked. Design Team, they're supposed to sit around 14 Randy Adair testifies, "Eh, the 14 and brainstorm what are the potential problems 15 vents get blocked, there's no pressure, 15 16 if X happens, if Y occurs, what is the result. pressure -- or no pressuriza -- no pressure 16 17 And --17 equalization, you can have unwanted delivery 18 Q. And it --18 of insulin." So it's not a -- it's not a huge 19 19 leap. From an engineering standpoint, Adair A. -- certainly you have a new product, and this is why -- this is why I'm so 20 20 knew the consequences. They just never 21 emphatic that a reasonable person would 21 bothered to sit down apparently to -- to think conclude an adequate risk assessment or human 22 22 and do the -- the FMEA or the fault tree factors assessment would have identified this. 23 23 analysis to -- to put it together. 2.4 You have a new product. The --2.4 We putting out a cap with vents on 25 the product is the P-cap. Medtronic or 25 it. Nobody has ever done that before. What's Page 216 Page 217 1 W. VIGILANTE W. VIGILANTE 1 2. 2 the potential or the problems that can occur the consequence of that? That -- that's the 3 if the block -- if the vent gets blocked. 3 follow-on question. What is the consequence 4 Q. And if they, in that brainstorming 4 of that? 5 5 process, they don't identify everything that So you take it back to your Design can go wrong, they've simply failed in their 6 б Team. If you're a human factors guy and you 7 7 iob? don't know what the consequences are, you take 8 A. If -- if they took reasonable 8 it back to the Design Team and let them deal 9 steps, then they wouldn't have failed in the 9 with it. What are the consequences of getting 10 the inside of the P-cap wet. Randy Adair will 10 risk assessment, but, again, they've got the 11 human factors assessment to back it up. 11 tell you, "Oh, it'll block the vent." Well, 12 Q. But what --12 what are the consequences of that? Randy A. So you're going to do the -- your 13 Adair will tell you, you can have no pressure 13 14 usability testing. If you're doing it on the 14 equalization and you can get the reservoir 15 IFU that Rachel Dennert was provided, you're plunger moving on its own. 15 going to see that people are getting -- are 16 MR. SCHULTZ: Would you mark that? 16 17 removing the -- the reservoir from under the 17 (Exhibit Vigilante-12, multipage 18 vial; and when it happens, depending upon the 18 document entitled Report of Protocol EP002 19 pressurization, you're either going to get a 19 and EP003: Usability Study of the Platform squirt out or you're going to get drops out, 20 3 User-Filled Reservoir Assembly and Its 20 21 but you're going to get some fluid out if 21 Instructions for Use, is marked for 22 22 identification.) there's enough pressurization and insulin in 2.3 the vial. 2.3 THE WITNESS: Thank you. So now you've identified another 24 24 (Exhibit Vigilante-13, multipage document entitled ER-99-11-09-2256 25 problem. Well, what just happened and what is 25

Yes, in Vigilante-12, McConnell-8 is the report from the usability studies that were conducted Q. Now, if you look at A in 2000 and 2001. Q. If you would look at Page 4, the first and tell me if I've got it wrong, but the steps that Medtronic went through, first of all, were a task analysis followed by a usability study; correct? A. They did do a task analysis followed by a usability study. Q. And that is a proper sequence of events to do, right, task analysis followed by	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	W. VIGILANTE  A. I don't have any problem with the sequence of it.  Q. All right. The task analysis you are critical of, I think you said earlier, because they didn't Medtronic did not break each task down into sub-tasks; correct?  A. Correct.  Q. So, for example, on Page 4 of Exhibit 12, Tasks Evaluated Number 7 says, "Remove the transfer guard and medication vial from the reservoir."  Do you see that?  A. Yes.  Q. And you criticize that because it should have been broken down; is that right?  A. I criticize it because if they did do that, they didn't document it and I don't see it anywhere.  Q. Okay. How should that have been broken down in your opinion?  A. Well, the I don't have the benefit of having the IFU, but apparently according to the next table, it involves the

Page 222 Page 223 1 W. VIGILANTE 1 W. VIGILANTE 2 pulling the plunger rod completely out of the 2 guard, they should break that into sub-tasks 3 3 reservoir and it includes -of twist the reservoir and pull; is that 4 Q. Could you tell me where you're 4 5 5 looking at? A. I would like to see the sub-steps. 6 A. Yeah, you're talking about Step 8; 6 I would like to see the information necessary 7 7 for the user to know what steps are required. right? 8 Q. I'm talking about Step 7. 8 I would like to see an assessment of the A. I'm sorry. I apologize. So I was 9 9 potential errors that could be made. I would 10 10 reading Step 8. like to see an assessment of whether or not the individual actions are consistent with 11 So Step 7 on Page 6, there's a 11 12 twist motion and then there's a pull motion. 12 norms, conventional norms, known behavioral So they only -- you know, they identified the 13 tendencies and so forth. 13 task, the -- the higher-level task, "Remove 14 14 Q. Well, we're -- we're just the transfer guard from the reservoir." But 15 talking -- or I was just talking about the 15 what are -- what steps are necessary to 16 task analysis for the moment. 16 17 perform that task? And apparently there's a 17 A. That is the task analysis. twisting motion and a pulling motion. And the 18 18 O. Okav. 19 twisting motion is in a certain direction. Of 19 A. This is the -- that's -- that's my 20 20 course, the pulling motion is also in a point. 21 certain direction depending upon the 21 Q. The task analysis includes 22 orientation of the reservoir, but it's not 22 usability as well? A. Well -- well, yes, it's a human 23 23 identified. 24 2.4 factors analysis. It's -- it's -- you're Q. And so your point is in this task 25 of removing the reservoir from the transfer 25 looking at whether or not it's usable --Page 224 Page 225 W. VIGILANTE 1 W. VIGILANTE 1 2 O. You don't --2 task analysis and usability study? What is it 3 A. -- so you -- you need to know what 3 that Medtronic didn't do that it was supposed 4 needs to be done and whether or not what 4 to in your opinion? 5 you're asking them to do is -- is -- is --5 A. Yeah, well, number -- well, they 6 would be defined as usable. 6 identified the top tasks, but they didn't 7 Q. You don't distinguish between a 7 break it out, so we don't know whether or not task analysis and a usability study? 8 they looked at the individual sub-steps or 8 9 A. Well, no. There is a difference 9 individual actions necessary to complete the 10 between a task analysis and a usability study, 10 task. There was no assessment as to what 11 but part of the task -- task analysis is to 11 information the user needed to complete the 12 assess the usability of the steps. It's done 12 sub -- the -- the actions or the task. by the professional human factors ergonomist. 13 13 So, for example, with Number 7 in And part of the task assessment is 14 the IFU that was assessed in the task 14 looking at whether or not the actual 15 analysis, which is Step Number 6 in the IFU 15 individual steps would be considered usable or 16 16 that Mrs. Dennert was exposed to, you would 17 not based upon the comfort, efficiency, number 17 need to know that you have to have the 18 of steps, whether or not it meets conventional 18 reservoir over the insulin vial to pull it out 19 norms, whether or not it meets users' 19 properly. So that's a piece of information 20 that the task analysis should have identified 20 expectations, whether or not the user needs 21 any special knowledge or information to 21 because you're looking at the actions, what's 22 complete the task. That's all part of what 22 required to be done, and then you're looking the task analysis should be ferreting out. 2.3 at, well, what knowledge does the user need to 2.3 24 have to know how to do those actions. 24 Q. So, I'm sorry. Then I -- I lost 25 25 you. What is your criticism exactly in this Then you need to look at whether

Page 226 Page 227 W. VIGILANTE W. VIGILANTE 1 1 2 2 or not the actions are consistent with, again, have to twist. Third is they have to pull. 3 3 conventional norms, behavioral tendencies and Well, what can go wrong and where could they 4 so forth. You have to determine looking at it 4 make a mistake or -- or deviate from what is 5 5 whether or not the action is going to be required. Well, if they're supposed to take 6 comfortable, whether or not it's going to be 6 it off upside down, what happens if they take 7 7 inducing any undue stress, whether or not it's it off upside right. That's something that 8 8 going to be efficient or not; and I don't see you would expect them to identify in the task 9 any of that analysis in here. 9 analysis. And then as part of the task 10 The other thing that task analysis 10 analysis is you're looking at what are the consequences of those errors, what are the 11 looks at is you're breaking them down, those 11 12 tasks down to sub-actions, what errors can 12 hazards that can result because of those --13 occur. This is the part of the assessment, 13 because of those errors. 14 14 analysis that you're looking at potential So, again, if you're a human errors. So it gets back to your hazard 15 factors guy and you're doing your task 15 foreseeability and what is done from a product 16 analysis and you realize that they have to --16 17 design standpoint to identify hazards. Well, 17 we want them to do it with the vial below the the task analysis is done. And at these steps 18 reservoir, foreseeable that somebody is not 18 19 you're looking at, well, where -- where can 19 going to do it that way, they're going to do 20 it the other way. Maybe they're going to do 20 they go wrong. If we're removing the 21 reservoir from the transfer guard, what can 21 it horizontally. What's the consequences. 22 22 they do wrong. Well, if you're doing your task 23 23 They've got several sub-actions analysis, you see what the consequences are. they have to do. One of the actions is make 2.4 The insulin comes out. Well, what's the 2.4 25 sure the reservoir is on top. Second is they 25 consequence of that. If I don't know, then I Page 228 Page 229 W. VIGILANTE 1 1 W. VIGILANTE 2 got to take it to the engineer and say what's 2 demonstrate on the video since we're on video. 3 the consequence of the insulin coming out. 3 Maybe I can talk about it too. 4 And then you move it, you know, through the 4 This is the -- the reservoir 5 5 Development Team. But these are the types of attached to the transfer guard as it's shipped 6 6 from Medtronic, and I believe it starts with things that you expect to be caught during the 7 task analysis. 7 the plunger retracted -- retracted. 8 Q. In your report, I -- and correct 8 Part of the process is you put 9 me if I'm wrong, you criticize Medtronic, at 9 your insulin in. You -- you press --10 Q. Here, I'll tell you what: As long 10 least as I understand it, for failing to 11 recognize that the process of filling the 11 as you're going to demonstrate -- first of 12 reservoir requires the user to do -- I think 12 all, is it your testimony that this is you used the word "unnatural things" or, you 13 unnatural, what they're being asked to do, or 13 know, stressful movements and things of that 14 uncomfortable? 14 15 15 nature. You know what I'm referring to? A. Well, no, I'm getting to it. If -- if you allow me to finish, I can tell 16 A. Yes. 16 17 Q. Okay. Can you just very briefly 17 you what -- what the problems I have. Q. If you would allow me to set up 18 tell me what is -- what is that critique, that 18 you're saying that the way the process was set 19 19 the question, please. up, it was going to be difficult and 20 20 A. I was answering your last 21 uncomfortable for the user and, therefore, 21 question. 22 Medtronic should have seen why it would be 22 MR. HAVERTY: You're -- Dave, you 2.3 done differently? 2.3 did it again. You asked him the 24 A. What I'm saying is a couple things 24 question -in the report, and I -- maybe I can 25 25 MR. SCHULTZ: Kevin, be quiet.

	Page 230		Page 231
1	W. VIGILANTE	1	W. VIGILANTE
2	MR. HAVERTY: No. Excuse me, Dave.	2	when he gets off on a tangent, I'd like to
3	Q. Mr. Vigilante	3	redirect him. That's perfectly appropriate
4	MR. HAVERTY: No, no, this is	4	and you I have wasted incredible amounts
5	this is this is the third time that you	5	of time with this witness going off making
6	not allowed you asked a question. He's	6	speeches, being non-responsive and I'm
7	giving you an answer. I'm sorry that you	7	simply trying to be efficient in this
8	don't like the answer, but he's giving the	8	deposition.
9	answer and he's entitled to give the	9	MR. HAVERTY: I'm sorry that you
10	answer and he's chitica to give the	10	MR. SCHULTZ: I'm already not going
11	MR. SCHULTZ: Kevin.	11	to finish today because of his
12	MR. HAVERTY: Dave.	12	MR. HAVERTY: Well, he's not coming
13	MR. SCHULTZ: Kevin	13	back, Dave, so you're finishing it. You're
14	MR. HAVERTY: Dave.	14	either finishing
15		15	
	MR. SCHULTZ: may I let me	16	MR. SCHULTZ: I have no, no.
16	know when I may speak. Are you done?		MR. HAVERTY: He's not coming back.
17	MR. HAVERTY: Yeah, I'm done.	17	MR. SCHULTZ: Kevin, I did not
18	MR. SCHULTZ: Okay.	18	choose ten o'clock. You insisted on ten
19	MR. HAVERTY: Speak.	19	o'clock. I have a plane I cannot miss. It
20	MR. SCHULTZ: Here's my problem:	20	is not my problem and I am
21	Okay? He apparently doesn't ans doesn't	21	MR. HAVERTY: Dave
22	understand the question I'm asking and I	22	MR. SCHULTZ: entitled to seven
23	want to focus his attention on what I'm	23	hours.
24	trying to get him to answer. Hold on. I	24	MR. HAVERTY: You're going to and
25	was quiet while you interrupted. And so	25	you're Dave, here's the story: This is

		00	
	Page 234		Page 235
1	W. VIGILANTE	1	W. VIGILANTE
2	done. We're going to finish this	2	where you're going with this is that one of
3	deposition today. He's not coming back.	3	the reasons Medtronic failed to identify
4	MR. SCHULTZ: Kevin.	4	hazards is because they didn't appreciate, in
5	MR. HAVERTY: I'm not I'm not	5	your opinion, that the reservoir-filling
6	doing it. I'm not producing him.	6	process required the user to do things that
7	MR. SCHULTZ: Well, we'll see about	7	were uncomfortable or stressful or unnatural.
8	that.	8	Is that a fair summary?
9	MR. HAVERTY: And by the way,	9	A. So as I was explaining, and I
10	here I'm sorry to do this to you: Could	10	think I'm going to answer your second question
11	you please can you get that question	11	if I get done with my first. But there's a
12	back, the question he originally asked	12	couple things in the process that Medtronic is
13	MR. SCHULTZ: No, no, no.	13	
14	MR. HAVERTY: so we can see that	14	asking users to do that are unnatural and that
15		15	results in stressful postures. So the first
16	he's	16	thing
17	MR. SCHULTZ: No, no, no.	17	Q. And, therefore, they'll do it
	MR. HAVERTY: No?	18	differently?
18	MR. SCHULTZ: We're moving on.		A. Therefore, it's unnatural; and if
19	Okay? It's my deposition, Kevin, not	19	it's unnatural, they're not going to naturally
20	yours.	20	do it. And part of usability is having people
21	BY MR. SCHULTZ:	21	to do things that are natural so that they
22	Q. Mr. Vigilante, okay, here's I'm	22	don't need instructions and warnings to tell
23	trying to be efficient here. I want to hear	23	them to do something that's contrary to what
24	your opinion, okay, but I need to understand	24	they would believe is natural.
25	the context for it. The context for I think	25	Q. Are you about to
	Page 236		Page 237
1	W. VIGILANTE	1	W. VIGILANTE
2	A. That's the that's the on	2	Q. I'd like you to demonstrate the
3	Q show me what's unnatural?	3	reservoir-filling process but use the vial of
4	A that's the whole point. I'm	4	insulin because that is part of the process,
5	about to show you, so	5	is it not?
6	Q. Then let me let me give you	6	A. I don't need a
7	something that will help you.	7	Q. Here you go.
8	A. I don't need that. I don't need	8	A. I don't need it for what I was
9	that. So	9	trying to answer for your initial question.
10	Q. I I would like you to use it	10	So if I'm able to do that and if I need it for
11	A. Let's stop.	11	an additional question, I'll take that under
12	Q please.	12	advisement.
13	A. Let me finish and then we can get	13	But the point I was trying to make
14	on to your on to your your	14	is that you've got the reservoir you're going
15	demonstration.	15	to flip, so flipping it up, now I've got to
16	Q. No, actually, I I'm the one	16	elevate my shoulder, if you see where my right
17	that gets to ask the questions, Mr. Vigilante.	17	shoulder is, so before my right shoulder was
18	MR. HAVERTY: Yeah, but you don't	18	down.
19	get to dictate his demonstration, Dave.	19	THE VIDEOGRAPHER: Can you put your
20	MR. SCHULTZ: I didn't	20	screen down, please. It's blocking.
21	MR. HAVERTY: He's answering your	21	A. So as I'm filling it, tapping it,
22	question. You're refusing	22	doing everything I need to do, my shoulders
23	MR. SCHULTZ: Yes, I actually do,	23	in a are in a a neutral posture. To
24	Kevin.	24	remove the reservoir, I've got to flip it up
25	MR. HAVERTY: No, you don't.	25	putting my shoulder into a non-neutral

Page 238 Page 239 W. VIGILANTE 1 1 W. VIGILANTE 2 2 posture. Now, I've got to rotate my wrist you're in a neutral position, you just have to 3 3 down and supinate it to turn and then -- I supinate it. There is no flexion, so it's 4 pulled it the wrong way -- and then pull. 4 less stressful. And it's not consistent with 5 5 The more natural way to do it -conventional norms and it puts you in a less 6 the other thing I want to note too is that now 6 comfortable posture. 7 7 I'm manipulating with my strong hand 'cause So, again, looking at the task 8 8 I'm right-handed, as you would expect, and analysis, these things -- if they were done on I've got my dominant hand over my weak hand. the IFU that was provided to Mrs. Dennert, 9 9 10 10 Most things that require fine motor skills, would have been a -- would have been and 11 for example, maybe turning a knob, a doorknob 11 should have been identified. 12 is a good example, if it's -- if you need some 12 Q. What do you mean "not on the IFU pressure on it, typically what you're doing is 13 provided"? What -- what are you saying there? 13 you're putting your strong hand under your 14 I don't follow. 14 weak hand. Very rarely does a user come up to 15 15 A. Because the IFU provided to a door and reverse it to turn the doorknob. 16 Ms. Dennert is different than the IFU they did 16 17 So typically you've got your strong hand under 17 the task analysis on, they did the usability 18 18 test on. That was something -vour weak hand. 19 19 Q. In what way? Medtronic is asking them to switch 20 A. -- that I argued that --20 that. They're asking them to go from a 21 neutral position with your shoulders to a 21 There's several ways. One, in the non-neutral position with your shoulders. 22 IFU they have the insulin bottle, and if this 22 They're asking you to make two different 23 23 is our table, sitting on the table for the --24 movements with your wrist. You've got to flex 2.4 whoops -- insertion, the pumping, and the 25 it down and you have to supinate it. If 25 filling. I -- I don't have that locked in. Page 241 Page 240 1 1 W. VIGILANTE W. VIGILANTE 2. 2 So in the IFU they did the task problem is because if you go like this 3 analysis on, usability testing on they have 3 (indicating) and you remove -- I'm sorry. 4 the insulin bottle on the table and they're 4 You're going -- you're supposed to go like 5 5 removing the reservoir from the insulin vial this to this (indicating) and remove the 6 6 reservoir. But what's happening is while it's still sitting on the table. 7 7 In the IFU that is in this packet Ms. Dennert in the YouTube videos I shaw -- I 8 8 saw and Mark Curtis in his demonstration, they that was given to Mrs. Dennert, that's not 9 what they do. They show the user -- I don't 9 don't do it like that. They're filling the 10 10 know if you can zoom in on that, these top tube. They're tapping it out. They're steps. They show the user removing, 11 getting to the right level and they're 11 12 pressurizing with the -- the reservoir upside 12 removing it. And when you do that, you're down and then turning it upside down to push 13 giving the insulin in the vial opportunity to 13 air in and pull out in Step Number 3. Turning 14 spill out on to the top of your reservoir. 14 15 Now, with the top of reservoir 15 it upside down to push air in and pull air out contaminated, the next step is to put it into and then to tap the bottles in Step 4. In 16 16 your P-cap and now you've just contaminated Step 5 -- I'm sorry. 3 is to pump the air 17 17 into the insulin reservoir. 4 is to pull the 18 your vents. Take out your plunger, put it in 18 19 insulin into the reservoir from the vial. 19 the pump, and next thing you know, you're 20 getting insulin out of the cannula quick --20 Step 5 is to tap the bubbles out. Step 5 is 21 continuation of stepping -- tapping the 21 quick disconnect. You think your priming is bubbles out and getting the insulin to the 22 done. You go about your business. 22 level you want it, and then 6 is removing the 2.3 Unbeknownst to you the plunger continues to --23 24 to move in delivering unwanted insulin. 24 reservoir. And 6 you have to go from this to

25

this (indicating); and that's where the

25

Q. Done?

	Page 242		Page 243
_		_	
1	W. VIGILANTE	1	W. VIGILANTE
2	A. Yes.	2	Q. I just one at a time, please.
3	Q. So as I understand it, you're	3	A. Sure.
4	saying that the process or the requirement	4	Q. Did you see that I did not move my
5 6	that you flip the vial over is unnatural and	5 6	shoulder?  A. I did see that.
7	requires a stressful and uncomfortable	7	
	position; correct?	8	Q. Okay. A. And are
8 9	A. Yeah, having to remove the	9	
10	Q. May I see it?	10	Q. If I place it on the table
11	A. Sure. Having to remove the	11	A are you right-handed or
12	reservoir from over the insulin means you have	12	left-handed? Can we put that on the record?
13	to swap it.	13	Q. Sure. I'm right-handed. I've
14	Q. Okay. Mr. Vigilante, do you see	14	been using
15	that I have the reservoir underneath right now?	15	A. Okay. Q my left hand, but I can do it
16	A. Sure.	16	with my right hand as well.
17		17	A. Okay.
18	Q. You see that I now have it on top?	18	Q. Okay. Do you know, by the way,
19	<ul><li>A. Yep.</li><li>Q. You see that I've flipped it back</li></ul>	19	which what the neurological studies of
20		20	Rachel Dennert have shown as to the dominance
21	to being underneath? A. Yes.	21	of her hand?
22		22	
23	Q. You see that I've never moved my	23	A. Nope.
23 24	shoulder during that process?  A. You still haven't tried to take it	24	Q. Okay. A. Doesn't matter.
25	off.	25	
25	011.	25	Q. Do you know if
	Page 244		Page 245
1	W. VIGILANTE	1	W. VIGILANTE
2	A. It's weak hand, strong hand.	2	Q. Okay. I've got the reservoir.
3	Q. Do you know which hand is her	3	Put it on the table and remove it.
4	dominant hand?	4	A. There's no there's no
5	A. It doesn't matter. It's weak	5	requirement to put it on the table.
6	hand, strong hand.	6	Q. Okay. It's off the table. What's
7	Q. So your point is that people can't	7	unnatural about that?
8	or don't use their weak hand for any part of a	8	A. Two things. You have your weak
9	process like this?	9	hand under your strong hand. That is a
10	A. I'm not saying they don't. What	10	unnatural position.
11	I'm saying is that the process that is in that	11	Q. Okay. Right now will you agree
12	IFU is unnatural, and when you don't point it	12	with me
		13	MR. SCHULTZ: Do you have this on
13	out in the IFU, you're going to have people		
	out in the IFU, you're going to have people doing it wrong and that is foreseeable	14	the video?
13		14 15	
13 14	doing it wrong and that is foreseeable		the video? Q. Do you agree with me that I have
13 14 15	doing it wrong and that is foreseeable Q. That's the	15	the video?
13 14 15 16	doing it wrong and that is foreseeable Q. That's the A and the consequence of that	15 16	the video? Q. Do you agree with me that I have my strong hand, my dominant hand
13 14 15 16 17	doing it wrong and that is foreseeable Q. That's the A and the consequence of that foreseeability is getting insulin on the top	15 16 17 18 19	the video? Q. Do you agree with me that I have my strong hand, my dominant hand A. Yes.
13 14 15 16 17 18	doing it wrong and that is foreseeable Q. That's the A and the consequence of that foreseeability is getting insulin on the top of that	15 16 17 18	the video? Q. Do you agree with me that I have my strong hand, my dominant hand A. Yes. Q on the reservoir
13 14 15 16 17 18 19 20 21	doing it wrong and that is foreseeable Q. That's the A and the consequence of that foreseeability is getting insulin on the top of that Q. But the	15 16 17 18 19 20 21	the video? Q. Do you agree with me that I have my strong hand, my dominant hand A. Yes. Q on the reservoir A. Yes. Q underneath, right? The vial is not
13 14 15 16 17 18 19 20 21 22	doing it wrong and that is foreseeable Q. That's the A and the consequence of that foreseeability is getting insulin on the top of that Q. But the A reservoir.	15 16 17 18 19 20 21	the video? Q. Do you agree with me that I have my strong hand, my dominant hand A. Yes. Q on the reservoir A. Yes. Q underneath, right? The vial is not A. Yes.
13 14 15 16 17 18 19 20 21 22 23	doing it wrong and that is foreseeable Q. That's the A and the consequence of that foreseeability is getting insulin on the top of that Q. But the A reservoir. Q the part that I don't understand, which is all I'm trying to find out from you, is what's unnatural? What makes	15 16 17 18 19 20 21 22 23	the video? Q. Do you agree with me that I have my strong hand, my dominant hand A. Yes. Q on the reservoir A. Yes. Q underneath, right? The vial is not A. Yes. Q on the table and I've just
13 14 15 16 17 18 19 20 21 22 23 24	doing it wrong and that is foreseeable Q. That's the A and the consequence of that foreseeability is getting insulin on the top of that Q. But the A reservoir. Q the part that I don't understand, which is all I'm trying to find out from you, is what's unnatural? What makes this unnatural?	15 16 17 18 19 20 21 22 23 24	the video? Q. Do you agree with me that I have my strong hand, my dominant hand A. Yes. Q on the reservoir A. Yes. Q underneath, right? The vial is not A. Yes. Q on the table and I've just removed the insulin reservoir from the vial?
13 14 15 16 17 18 19 20 21 22 23	doing it wrong and that is foreseeable Q. That's the A and the consequence of that foreseeability is getting insulin on the top of that Q. But the A reservoir. Q the part that I don't understand, which is all I'm trying to find out from you, is what's unnatural? What makes	15 16 17 18 19 20 21 22 23	the video? Q. Do you agree with me that I have my strong hand, my dominant hand A. Yes. Q on the reservoir A. Yes. Q underneath, right? The vial is not A. Yes. Q on the table and I've just

	Page 246		Page 247
1	W. VIGILANTE	1	W. VIGILANTE
2	but the problem is the step before. You're	2	A. We'll do it by the we'll do it
3	holding the unit with your strong hand.	3	by the instructions.
4	Q. Okay. You want me to do it with	4	Q. Okay.
5	my weak hand? Now I'm holding it with my weak	5	A. All right. So we've got our
6	hand.	6	you can hold the reservoir with your strong
7	A. No, you're not	7	hand. The other way. The other way. There
8	Q. How is that unnatural?	8	you go. Now, you're going to be pumping air
9	A you're not you're not	9	into the insulin vial.
10	understanding.	10	Q. Okay.
11	Q. I I most clearly am not	11	A. Okay. You got it on there. Now,
12	understanding.	12	
			you're going to
13	A. No, you're not, so let me	13	Q. It's on there.
14	Q. So	14	A you're going to turn the unit
15	A show you.	15	over.
16	Q. No. Why don't you walk me through	16	Q. Okay.
17	it? I'll hold it. You tell me what I need to	17	A. You're going to bring it up
18	do.	18	because you're looking for air bubbles.
19	A. Well, you need to get it off the	19	Q. Bring what up?
20	table.	20	A. You're not looking at it down,
21	Q. Okay. Which hand do you want	21	you're bringing the unit up.
22	A. You need to	22	
			Okay. Hold on a minute. You're
23	Q me to hold it in?	23	going to pump air in and out. Using your
24	A. The strong hand's fine.	24	right hand you're going to push the plunger
25	Q. Okay.	25	in.
	Dago 240

	W. VIGILANTE Q. Okay.		W. VIGILANTE A. Yeah. Well, I think most people
2 3	<ul><li>W. VIGILANTE</li><li>Q. Okay.</li><li>A. Using your weak hand you're going</li></ul>	2 3	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can
2 3 4	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir.	2 3 4	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The
2 3 4 5	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay.	2 3 4 5	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over.
2 3 4 5 6	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard.	2 3 4 5 6	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over.  Q. Which hand do you want me to use?
2 3 4 5 6 7	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay.	2 3 4 5 6 7	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over. Q. Which hand do you want me to use? A. It shows that you're going to flip
2 3 4 5 6 7 8	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the	2 3 4 5 6 7 8	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over. Q. Which hand do you want me to use? A. It shows that you're going to flip it over with your right hand on the reservoir.
2 3 4 5 6 7 8 9	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out.	2 3 4 5 6 7 8 9	W. VIGILANTE  A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over.  Q. Which hand do you want me to use?  A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong.
2 3 4 5 6 7 8 9	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out. No, no.	2 3 4 5 6 7 8 9	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over. Q. Which hand do you want me to use? A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong. Q. On the reservoir.
2 3 4 5 6 7 8 9 10	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out. No, no. Q. Oh, the plunger. I'm sorry.	2 3 4 5 6 7 8 9 10	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over.  Q. Which hand do you want me to use? A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong.  Q. On the reservoir.  Oh.
2 3 4 5 6 7 8 9 10 11 12	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out. No, no. Q. Oh, the plunger. I'm sorry. Okay.	2 3 4 5 6 7 8 9 10 11	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over. Q. Which hand do you want me to use? A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong. Q. On the reservoir. Oh. A. You just did it wrong.
2 3 4 5 6 7 8 9 10	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out. No, no. Q. Oh, the plunger. I'm sorry.	2 3 4 5 6 7 8 9 10 11 12	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over. Q. Which hand do you want me to use? A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong. Q. On the reservoir. Oh.
2 3 4 5 6 7 8 9 10 11 12	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out. No, no. Q. Oh, the plunger. I'm sorry. Okay.	2 3 4 5 6 7 8 9 10 11	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over. Q. Which hand do you want me to use? A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong. Q. On the reservoir. Oh. A. You just did it wrong.
2 3 4 5 6 7 8 9 10 11 12 13	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out. No, no. Q. Oh, the plunger. I'm sorry. Okay. A. Okay. Now, you're going to hold the plunger body with your left hand.	2 3 4 5 6 7 8 9 10 11 12	W. VIGILANTE A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over. Q. Which hand do you want me to use? A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong. Q. On the reservoir. Oh. A. You just did it wrong. Q. Does it matter if I A. It does matter because you're
2 3 4 5 6 7 8 9 10 11 12 13 14 15	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out. No, no. Q. Oh, the plunger. I'm sorry. Okay. A. Okay. Now, you're going to hold the plunger body with your left hand. Q. Okay.	2 3 4 5 6 7 8 9 10 11 12 13	W. VIGILANTE  A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over.  Q. Which hand do you want me to use?  A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong.  Q. On the reservoir.  Oh.  A. You just did it wrong.  Q. Does it matter if I  A. It does matter because you're asking people to follow your IFU and then
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out. No, no. Q. Oh, the plunger. I'm sorry. Okay. A. Okay. Now, you're going to hold the plunger body with your left hand. Q. Okay. A. Okay. Now, you're going to flick	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	W. VIGILANTE  A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over.  Q. Which hand do you want me to use?  A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong.  Q. On the reservoir.  Oh.  A. You just did it wrong.  Q. Does it matter if I  A. It does matter because you're asking people to follow your IFU and then giving them a hard time if they don't, and I'm
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	W. VIGILANTE Q. Okay. A. Using your weak hand you're going to grab the reservoir. Q. Okay. A. I'm sorry. The transfer guard. Q. Okay. A. And you're going to pull the plunger out. No, no. Q. Oh, the plunger. I'm sorry. Okay. A. Okay. Now, you're going to hold the plunger body with your left hand. Q. Okay. A. Okay. Now, you're going to flick with your right hand.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	W. VIGILANTE  A. Yeah. Well, I think most people are going to hold it up here where they can see it which becomes part of the problem. The next step is, is you're going to flip it over.  Q. Which hand do you want me to use?  A. It shows that you're going to flip it over with your right hand on the reservoir. You just did it wrong.  Q. On the reservoir.  Oh.  A. You just did it wrong.  Q. Does it matter if I  A. It does matter because you're asking people to follow your IFU and then giving them a hard time if they don't, and I'm telling you the IFU is poorly done

Which hand do you want me to use?  A. It shows that you're going to flip it over with your right hand on the reservoir.  You just did it wrong.  Q. On the reservoir.  Oh.  A. You just did it wrong.  Q. Does it matter if I  A. It does matter because you're asking people to follow your IFU and then giving them a hard time if they don't, and I'm telling you the IFU is poorly done  Q. Does it matter if  A so you just messed it up.  Q when I flip really? And  A. Yes.  Q and that's that's what's causing the temporary blocked vent, is that instead of grabbing it with the reservoir and

Page 250 Page 251 1 W. VIGILANTE 1 W. VIGILANTE 2 it? 2 Q. If -- but if -- if I find that 3 3 A. What's causing it is two things. unnatural for some reason, does the fact that 4 One is that the IFU is not clear, does not 4 I use one hand or the other hand make a 5 5 give warning; and two, the IFU is asking you difference? It doesn't, does it? Not in 6 to do tasks and swap hands unnecessarily. So 6 terms of --7 if you bring it down to a more natural, more 7 A. It shouldn't -- it -- I'm sorry. 8 8 efficient manner of doing it, you wouldn't be It shouldn't make a difference. It shouldn't 9 in the position to make these types of 9 make a difference. 10 10 mistakes. Q. It doesn't make a difference --11 11 A. So taking the --Q. Well, what's it --12 A. How many times did you switch 12 Q. -- in terms --13 A. -- taking the insulin vial off, 13 hands? It's going to be --Q. As many -either for inverted or upside down shouldn't 14 14 A. -- on the video. make a difference to the user, it shouldn't, 15 15 Q. -- times as you asked me to. A. I didn't ask you to. The IFU but it does. It makes a big difference. It 16 16 17 17 makes a deadly difference and that's the asked you to. problem. So it shouldn't make a difference to 18 18 the user because you're right, ten users come 19 Q. The IFU just shows that somebody's 19 20 20 holding it. in, eight, nine of them may do it one way, one 21 A. The IFU's telling you --21 or two of them may not. 22 Q. Does it matter if I switch my 22 Q. Yeah, does it... 23 23 (Pause.) hand? Q. Where does it say in the IFU that 24 A. If you're following the IFU, you 24 25 25 you have to hold the vial and the reservoir in are. Page 252 Page 253 1 W. VIGILANTE W. VIGILANTE 1 2. 2 the hand that's depicted? A. Yeah, so ultimately the way that 3 A. There's nothing in the IFU that 3 the unit's set up to avoid the anomaly with 4 says you don't have to do that. So, again, it 4 the prime/fill anomaly due to the blocked 5 gets back to if you're going to provide 5 vents is to remove the reservoir when it's on 6 somebody with a process and you want them to б top of the insulin vial. And you've already 7 7 do it a certain way to prevent a very, very, made my point several times, that it doesn't 8 matter. It shouldn't matter which hand you do 8 very severe hazard, you have to tell them, you 9 have to give them explicit instructions, you 9 it in. It shouldn't matter to the user 10 10 got to give them explicit warnings. If it's because if they -- if they make a mistake, if 11 okay to use it any which way you want, you 11 they do it in a way that's not depicted in the 12 have to recognize that as a designer and make 12 IFU, it shouldn't result in a catastrophic sure that a minor change in the process that's 13 injury; and because it can result in a 13 depicted doesn't result in somebody becoming 14 catastrophic injury, the least you could have 14 15 comatose and nearly dying. That -- that's done was made sure that the IFU was explicit 15 16 and specific and provided warning and provided 16 the -- that's the point. 17 Q. In terms of the temporary blocked 17 information to the user that this is important 18 vent condition, what matters is that the 18 you do it this way. It's important because if 19 patient follow the instruction that the 19 you don't, you can have a problem; and if you reservoir is to be above the vial when the 20 have a problem, it can cause severe and 20 21 reservoir is removed from the transfer guard; 21 permanent injury. 22 22 Q. What you're calling the right? That's what --2.3 catastrophic injury is not caused by what hand 2.3 MR. HAVERTY: What -- what in -the patient chooses to hold anything in. It's 24 Q. -- matters ultimately; right? 24 MR. HAVERTY: What instruction? 25 25 caused by removing the reservoir from the

	Page 254	50	Page 255

1	W. VIGILANTE	1	W. VIGILANTE
2	transfer guard with the vial above. Would you	2	Q. People who use these devices, some
3	agree with that?	4	are left-handed, some are right-handed A. Sure.
4 5	<ul><li>A. It they're related.</li><li>Q. It doesn't matter which hand I'm</li></ul>	5	Q correct?
6	holding it in. The issue, if it if it's	6	Are you saying that the IFUs
7	going to exist at all, exists by virtue of the	7	should be created one for left-handed people
8	orientation of the vial above the reservoir;	8	and one for right-handed people?
9	right?	9	A. I don't think so. I think the IFU
10	A. It it does, but they're	10	should be clear if they're requiring you to do
11	related, and they're related because the	11	it exactly the way it is, which to avoid this
12	orientation of the vial and the reservoir is a	12	hazard you have to do it exactly the way it
13	function of the different steps you're doing;	13	is, then they should tell you.
14	and you're starting off holding it with the	14	Q. Well, is it your opinion that
15	insulin vial you're starting off with the	15	A. All right. If they if they're
16	insulin vial down. You're flipping it up in a	16	giving you the ability to swap strong hand for
17	natural position so that you can get the	17	weak hand, then, yeah, that's fine as well.
18	bubbles out so that you can see and then	18	Q. Is it your testimony,
19	you're telling the user to flip it back over	19	Mr. Vigilante, that the user has to do I
20	to avoid a catastrophic injury, but you don't	20	think the phrase you just used was everything
21	highlight it, you don't put any notation in	21	exactly as it is in the F IFU in order to
22	here, you don't put any text in here to	22	avoid a temporary blocked vent?
23	describe what you just did and why you just	23	MR. HAVERTY: Objection. That's not
24	did it.	24	what he testified.
25	(Pause.)	25	MR. SCHULTZ: Well, that's what I'm

VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's
2 3 4 5 6 7 8 9 10 11 12	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question.	2 3 4 5 6 7 8 9 10 11 12	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct.
2 3 4 5 6 7 8 9 10 11 12 13 14	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on	2 3 4 5 6 7 8 9 10 11 12 13	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on how to do it properly and safely. So if you	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent got blocked.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on how to do it properly and safely. So if you don't follow the IFU, you're not doing it properly and you're not doing it safely. The question is: Does the user realize that	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent got blocked. Q. Well, Mrs. Dennert did not testify that the vent got blocked. She doesn't know, does she?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on how to do it properly and safely. So if you don't follow the IFU, you're not doing it properly and you're not doing it safely. The question is: Does the user realize that they're not doing it properly and, therefore,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent got blocked. Q. Well, Mrs. Dennert did not testify that the vent got blocked. She doesn't know, does she? A. I didn't say that.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on how to do it properly and safely. So if you don't follow the IFU, you're not doing it properly and you're not doing it safely. The question is: Does the user realize that they're not doing it properly and, therefore, it's unsafe? And the answer is no because	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent got blocked. Q. Well, Mrs. Dennert did not testify that the vent got blocked. She doesn't know, does she? A. I didn't say that. Q. Okay.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on how to do it properly and safely. So if you don't follow the IFU, you're not doing it properly and you're not doing it safely. The question is: Does the user realize that they're not doing it properly and, therefore, it's unsafe? And the answer is no because there's no warning in here to tell you that.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent got blocked. Q. Well, Mrs. Dennert did not testify that the vent got blocked. She doesn't know, does she? A. I didn't say that. Q. Okay. A. But we do know that Rachel had
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on how to do it properly and safely. So if you don't follow the IFU, you're not doing it properly and you're not doing it safely. The question is: Does the user realize that they're not doing it properly and, therefore, it's unsafe? And the answer is no because there's no warning in here to tell you that. So what happens, and we've seen it with Rachel	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent got blocked. Q. Well, Mrs. Dennert did not testify that the vent got blocked. She doesn't know, does she? A. I didn't say that. Q. Okay. A. But we do know that Rachel had testified or stated to her mother that
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on how to do it properly and safely. So if you don't follow the IFU, you're not doing it properly and you're not doing it safely. The question is: Does the user realize that they're not doing it properly and, therefore, it's unsafe? And the answer is no because there's no warning in here to tell you that. So what happens, and we've seen it with Rachel Dennert, we've seen it with Mark Curtis, we've	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent got blocked. Q. Well, Mrs. Dennert did not testify that the vent got blocked. She doesn't know, does she? A. I didn't say that. Q. Okay. A. But we do know that Rachel had testified or stated to her mother that earlier she got she thought she got some
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on how to do it properly and safely. So if you don't follow the IFU, you're not doing it properly and you're not doing it safely. The question is: Does the user realize that they're not doing it properly and, therefore, it's unsafe? And the answer is no because there's no warning in here to tell you that. So what happens, and we've seen it with Rachel Dennert, we've seen it with Mark Curtis, we've seen it with the YouTube videos that I found,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent got blocked. Q. Well, Mrs. Dennert did not testify that the vent got blocked. She doesn't know, does she? A. I didn't say that. Q. Okay. A. But we do know that Rachel had testified or stated to her mother that earlier she got she thought she got some insulin on the reservoir while doing the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. VIGILANTE trying to find out 'cause that's what I thought he said. A. It's my understanding that Medtronic and Unomedical provided this Q. That was A or maybe Medtronic provided this Q. Can you answer my question? A. I'm not done provided this IFU Q. I know you're not done. I'm just wondering if you can answer my question. A to to instruct the user on how to do it properly and safely. So if you don't follow the IFU, you're not doing it properly and you're not doing it safely. The question is: Does the user realize that they're not doing it properly and, therefore, it's unsafe? And the answer is no because there's no warning in here to tell you that. So what happens, and we've seen it with Rachel Dennert, we've seen it with Mark Curtis, we've	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	W. VIGILANTE are not doing it properly and that exposes them to the potential hazard. Q. In point of fact, we haven't seen it with Rachel Dennert. There's no testimony and no evidence in this case that anyone saw her remove the reservoir from the vial with the vial above; correct? A. That's correct. Q. Okay. A. The testimony from Mrs. Dennert's mother is that she did it correctly. Q. Correct. A. But somehow or another the vent got blocked. Q. Well, Mrs. Dennert did not testify that the vent got blocked. She doesn't know, does she? A. I didn't say that. Q. Okay. A. But we do know that Rachel had testified or stated to her mother that earlier she got she thought she got some

2	Q. Did she say she got it on the	2	reservoir be removed from the vial, right,
3	reservoir or did she say she got it on the	3	with the vial below the reservoir; correct?
4	night table and the end of the infusion set?	4	Isn't that a true statement?
5	A. Maybe it's the latter.	5	A. The true statement is, is to avoid
6	Q. Yeah.	6	it is
7	A. Sorry.	7	Q. No
8	Q. And that's not the infusion set	8	A to follow what the IFU
9	that's at issue in this case in any event, is	9	Q you know what, Mr. Vigilante,
10	it?	10	that's a simple question. It's a yes-or-no
11	A. My understanding is that they were	11	question and I would appreciate a yes or a no
12	both swapped out at the ten, eleven o'clock	12	answer.
13	changing.	13	Isn't it true that to avoid the
14	Q. Now, but the insulin spillage for	14	temporary blocked vent condition the step that
15	which we don't have any information as to how	15	is required is that the reservoir be removed
16	it occurred occurred at six o'clock or 6:46;	16	from the transfer guard with the vial in the
17	right?	17	down position? Is that true?
18	A. The insulin spillage that Rachel	18	A. That is not true.
19	reported to her mother was at 6:00 the	19	Q. Okay. Do you would you agree
20	6:30	20	with me that Step 7 in the IFU depicts the
21	Q. Right.	21	vial at the time of removal of the reservoir
22	A let's say the 6:30 change.	22	from the transfer guard as beneath, below the
23	Q. So back to my question. In order	23	reservoir which
24	to avoid the temporary blocked vent condition,	24	A. No.
25	the thing that is necessary is that the	25	Q. It doesn't depict that?

2	reservoir from the transfer guard with the	2	can answer my question
3	vial beneath the reservoir?	3	A. Well, first of all
4	A. Yes, there is. I just explained	4	Q as posed.
5	that before you	5	A it is it is my reservoir and
6	Q. What	6	transfer guard, so I I'm going to ask you
7	A took it off me and started	7	to give it back to me. If you want
8	demonstrating your own demonstrating, arguably	8	
9	demonstrating why it's a silly process and why	9	Q. Okay.
10		10	A to keep your insulin vial
	mistakes can be made and why they should have		Q. Here you go.
11	figured this out.	11	A and that's fine.
12	Q. Why is it unnatural	12	Q. I'll get you my own reservoir and
13	A. Here, give me	13	transfer guard and then I'll ask you the
14	Q to remove let me finish my	14	question.
15	question	15	A. So the the thing that counsel
16	A. I'm sorry.	16	is neglecting to state is that in in Step 5
17	Q please.	17	the reservoir is on top and it's held in this
18	A. Yeah, you're right.	18	position. This is the last position in Step 5
19	Q. Why is it unnatural to remove the	19	that the user is in, like this (indicating).
20	reservoir from the transfer guard with the	20	Step 6 wants you to flip it like
21	vial held beneath it?	21	this (indicating). So now we have our strong
22	A. May I see it?	22	hand above our weak hand. We have our
23	Q. Can you tell me?	23	shoulder flexed. And now to remove the
24	A. May I see it?	24	reservoir. I've got to flex my wrist and I
25	Q. Well, can just tell me if you	25	got to turn it. Oop. Wrong way. And turn
